

Training / Human Performance

SOLUTIONS

n-Link provides instructional design and training solutions through our pool of industry leading course designers and instructors. We implement industry-standard Analysis, Design, Development, Implementation, and Evaluation (ADDIE) processes to create high-quality training deliverables. Our approach includes our customers at every phase in the project lifecycle. We develop distributed learning and innovative staffing solutions through part-time and on-call augmentation staff, which significantly reduces expenses while ensuring surge requirements are met.

CAPABILITIES

Training services include:

- ✓ Highly-credentialed instructional systems design and training
- ✓ Comprehensive training solutions to meet the needs of rapidly changing environments
- ✓ Total project management and quality assurance for continuous process improvement and outreach services to increase classroom utilization

CUSTOMERS

United States Census Bureau

n-Link performs software testing, instructional design and development, instructor-led training, technical writing, and software programming in supporting systems and operational processing for customers including the Census Bureau.

U.S. Army Distributed Learning System (DLS)

n-Link supported the Army DLS enterprise architecture by managing and providing the underlying robust infrastructure that delivers standardized training to Soldiers and other learners anywhere and at any time. The n-Link team provided a worldwide fully automated, seamless, and web-accessible training network with fully trained onsite staff.

CASE STUDY

n-Link provided Digital Training Facility Managers and project management for 217 U.S. Army DTFs at 88 worldwide locations. We managed the classroom learning equipment, infrastructure, quality assurance, appropriate control inspections, and outreach to Soldiers at Army bases CONUS and OCONUS.
