

# How does it work?

**The IonCleanse results in only biocompatible electrical frequencies entering the water. Biocompatible frequencies elicit a relaxation response in the body.**

**Concurrently, the electrical frequencies create an ionic field that cleanses and purifies the body through the healing power of ions.**

**The IonCleanse process ionizes the water, as  $H_2O$  is split into  $OH^-$  and  $H^+$  ions. These ions attract**

**and neutralize oppositely charged toxins. After the process the user feels invigorated, refreshed, and relaxed.**

## **Is the IonCleanse safe?**

**The IonCleanse has been on the market since 2002. Our perfect safety record, medical-grade quality, and special proprietary technology ensure that the user will never be exposed to dangerous electrical frequencies. Other ionic foot bath machines expose the user to stress-inducing frequencies; such as EMFs, AC ripple, leakage current, and hazardous voltages. The potential side-effects from other footbaths range from disrupting the body's electrical system causing headaches, nausea, and other discomforts, to painful electrical**

**shocks. The Ionic footbath is the only unit with CE and FCC safety clearances. No other unit on the market has met these standards.**
