Background

As Project Architect, Mr. Strum has extensive experience in all aspects of design including proposal and initial program development; contract and construction administration; and project closeout. Mr. Strum is responsible for the management and preparation of design and construction documents for all phases of various Commercial, Industrial, and Residential projects.

Project Experience

- Responsible for design and construction of the Town of Oyster Bay Tobay Beach Ocean Pavilion renovations required as a result of sustained damage due to Super Storm Sandy. Prepared necessary documentation for FEMA.
- Responsible for reports and photographic documentation of existing building conditions for both residential and commercial structures. Performed site surveys and observations including fire damage investigations in accordance with the Town of Oyster Bay Regulations / Ordinances and as per the New York State Building Code Requirements.
- Responsible for design and construction of the synthetic turf field and upgraded amenities, most notably field lighting, at John F. Kennedy High School located in Plainview, NY.
- Responsible for design through construction of the synthetic turf athletic field as well as upgraded Park amenities at the Town of Oyster Bay Sabellico Field Park in South Farmingdale, NY.
- Responsible for the design of a new modular, pre-fabricated pre-school building and community center within the Town of Oyster Bay-Marjorie Post Park. Responsible for the drafting of construction documents, interior design and finish selection, as well as general project coordination.

- Responsible for the design and generation of plans to prepare for the development of the site-work related to athletic fields and support facilities to be constructed at the former Town of Oyster Bay-Sylvia Packard Middle School, in Plainedge, NY. Also involved in schematic representation of design proposal.
- Responsible for design through construction of a 5000sf Media Center and Library additions at Lincoln Avenue Elementary school in Sayville, NY. Developed architectural designs. Acted as primary interface with consultants, contractors and owners. Led on-site coordination of architectural activities. Ran construction meetings. Prepared progress reports and schedules.
- Designed the shell structure for new 100,000sf exposition space at Jacob Javits Center in New York City.
- Designed a 5000sf expansion of Suffolk County Sheriff's Offices in Riverhead, NY.

Computer Skills: AutoCAD, Photoshop, QuickBooks, Microsoft Office, Excel, Word, PowerPoint.
