BI-FOLDING DOOR HARDWARE

## Evandor – 100kg bi-folding door hardware for timber doors

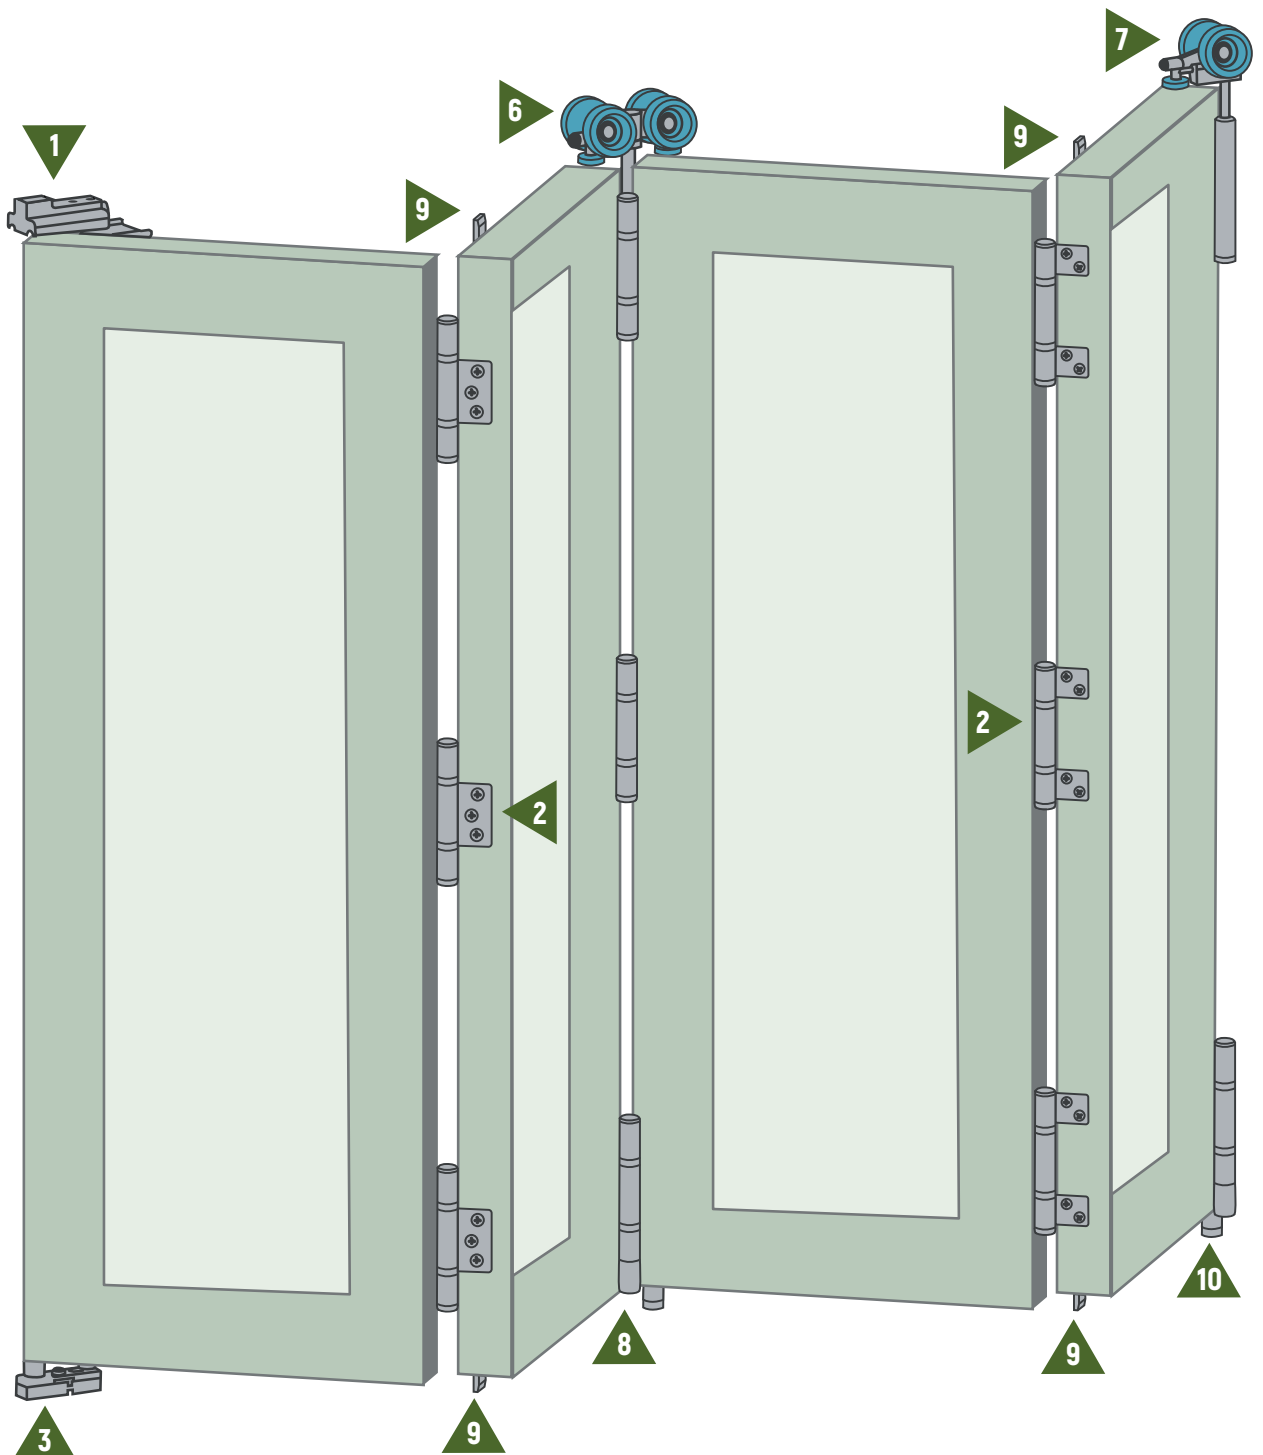

Evandor is the new name in bi-folding door hardware for external residential and commercial timber doors. Despite being a new system Evandor has extensive experience working with some of the leading folding/sliding door hardware manufacturers from around the world. This experience has allowed us to bring you a high quality, cost effective bi-folding door system to the U.K. market.

Evandor is a top hung external bi-folding door system for equal sized timber panels up to 1200mm wide and 100kg in weight. Manufactured from marine grade 316 stainless steel and using precision

bearings the system is designed to be durable with low maintenance requirements. Aluminium track and channel allow for a quiet smooth operation. The hardware is available in satin and polished finishes.

Evandor is fully adjustable and non-handled for easy installation. Available in either inward or outward applications with numerous folding configurations to suit your requirements. All components have been durability tested and come with a ten-year guarantee.

Please contact our technical department for further information.

### 1 TOP PIVOT

- ▶ Grade 316 cast stainless steel top pivot with aluminium cover plate
- ▶ Fully adjustable design
- ▶ Surface fixed bearing hinge
- ▶ 100kg weight capacity
- ▶ Satin and polished stainless steel finishes
