

YEAR: 1960's (early)

MAKE: Gordon Plastics

MODEL: Knight

HAND: Right

DRAW WEIGHT: 50#

AMO LENGTH: 62"

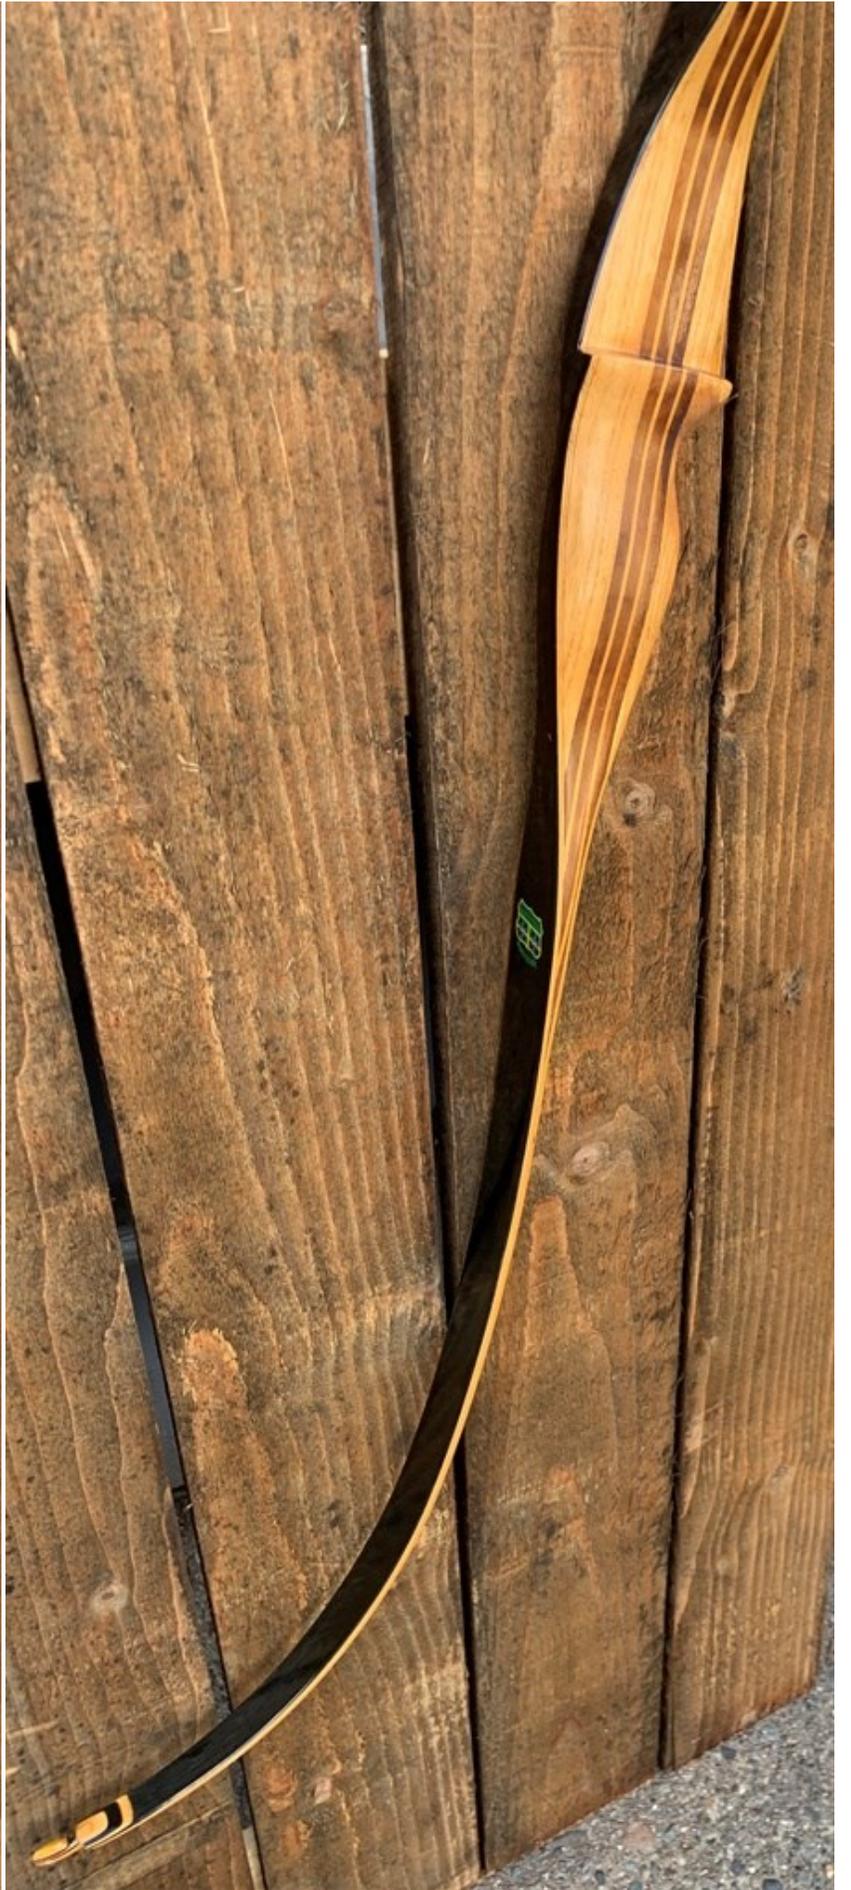

PRICE: \$89.00

SHIPPING AND HANDLING: \$19.00

TOTAL COST: \$108.00

DESCRIPTION: Gordon Plastics was the supplier of the fiberglass for the limbs of most every major bow company. Gordon also produced their own line of bows until the bow line was bought out and they focused solely on their fiberglass limb business. Very smooth and fast recurve. Not much of a grip. No delamination; limbs are straight. Overlays and tips are in great condition. No drilled holes. There are a few flaws: There is a short repaired hairline crack on the grip, and a chip on the arrow shelf that was repaired (see pic). There was a 1/2" stress line just below the arrow shelf that was filled in, but the repair is visible (see pic). No stress lines or crazing on the rest of the limbs. A few minor scratches and scuffs.
