

The Pancreatic and Hepatobiliary Surgery Team at Saint Agnes

More experience | Better outcomes

This multidisciplinary team offers expert care and surgical experience coupled with the compassion and quality that Saint Agnes is known for. The pancreatic and hepatobiliary team is a part of the Cancer Institute at Saint Agnes. Housed in state-of-the-art facilities that feature the latest diagnostic technologies and treatment options, the Cancer Institute has grown to be a leader in cancer treatment in the Baltimore region. However, the pancreatic and hepatobiliary team also treats the entire spectrum of benign and precancerous diseases of the liver, biliary tree, and pancreas, including all inflammatory and cystic diseases.

Over the past few years the pancreatic and hepatobiliary surgery team has consistently been a nationally recognized leader in pancreatic and hepatobiliary research, has achieved the highest quality outcomes for patients, and continues to be committed to providing your patients with leading treatment options in a safe and comforting environment located in their very own community. Our team treats each patient as an individual.

The pancreatic and hepatobiliary surgery team is part of a larger multidisciplinary team that discusses each individual patient to develop a unique treatment plan for each and every patient, and will ensure that you are informed as to their progress.

This team includes:

- Two Pancreatic and Hepatobiliary Surgeons
- Medical Oncologists
- Radiation Oncologists
- Diagnostic Radiologists
- Interventional Radiologists
- Gastroenterologists
- Geneticists
