

Contact Lens Prescription Policy

Integrated Eyecare will supply you with a paper or electronic copy of your contact lens prescription at the completion of your contact lens fitting. We now must document that you have received this contact lens prescription. Integrated Eyecare will be documenting the receipt of the contact lens prescription in one of two ways:

1. We will have you sign the paper copy of your prescription and the signed copy will be uploaded into your electronic health record.
2. We will be emailing you your contact lens prescription and asking that you respond to our email stating that you received your prescription. Note: emailing your prescription will not be HIPAA compliant.

I give Integrated Eyecare permission to electronically supply my contact lens prescription via email to me.
