Center

## Why Us?

Softub was invented in 1986 by Tom Thornbury with 22 patents on the unique "heat without a heater" technology. Yes, Softubs are sold worldwide, but not all Softub Dealers are alike. When buying the best hot tub on the market, make sure you buy from the best dealer in the industry. That would be us! We are here for you long term. We do not "drop and run". We provide a personalized website with instruction videos, water treatment cheat sheets, our cell phone numbers, and our show schedule. We are honest about water care, not all chemicals are the same. We alert you of preventive measures to keep your water safe and how to make your Softub ensure many years of enjoyment. Our average client's Softub will last 10-15 years! After 20 years in business, we are just now seeing clients replace their Softub, and with us, you will always have a trade in value. Of course, we do have several clients that have purchased a second Softub for an additional location! We are a full certified Softub Service Center equipped to service warranty claims and long term parts replacement.

## Meet the Owner

Amy bought her Softub in 1992 and fell in love with it instantly! She started selling Softubs in 1999 by bringing her own Softub to a Home Show. In less than one year she had sold over 100 Softubs becoming a "Top Ten" Dealer in the world! She now has over 3000 clients and loves what she does. "It's exciting to help people realize they deserve a Softub. You work hard, play soft." She now travels showcasing the Softub at Home Shows, Fairs, Festivals and other events. "It's great to show the portability of the Softub by rolling it into our booth, plugging it in and filling it up! People are amazed at what NO other hot tub can do! I have personally witnessed the benefits of hydrotherapy. Now anyone can enjoy hydrotherapy in their home, vacation home, condo, tiny home, RV spot or even camping. It's not a luxury, it's a necessity!"

## FACE THE FACTS!

Surgical stainless steel heat exchanger absorbs waste heat from the pump motor to warm the spa water to the desired temperature.

Softub is **NOT** inflatable.

It's made out of insulated foam with a 5 year warranty.

With proper care, your Softub will last 15 + years!

### Softub®

**Site Prep:** Any fairly level surface, indoors or out – no additional cost. Everything is flexible. No restrictions.

**Electric:** Plugs into regular household outlet no added costs. Cord with Ground Fault Indicator included.

**Installation:** Quick, easy delivery and setup by one person in just minutes.

**Portability:** Can easily roll through doorway, down stairs, or across yard. Weighs about 80 pounds.

**Relocate:** Easily moved from spot to spot, home to home, indoors or out.

**Heat:** Heat recovery system is effective and energy efficient. Monthly cost is \$10-\$15.

**Thermal Lid:** Insulated lid to save heat is standard. Combination locks included!

**Jet Power:** Strategically placed, interchangeable hydro jets for powerful hydrotherapy. Comfortably sit in a "jet free" area as well

**Safety / Comfort:** Easy entry and exit. Flat foam bottom for solid footing. Padded surface as comfortable as an easy chair.

**Seating:** Spacious, barrier-free seating allows a variety of positions and activities including water exercises.

**Usage:** Softub® is always hot and ready to use – 24 hours a day.

**LED Light:** Standard in all Softub with "dancing light"

### Acrylic

**Site Prep:** Construction, excavation, or concrete necessary for permanent location. Must be level

**Electric:** Installation of extra amperage or 220V-60amp line is needed. GFCI purchase is required.

**Installation:** Costly crew, plumbing, electrician costs, crane (or driveway delivery)

**Portability:** Cumbersome. Difficult or impossible to move. Typically weighs 400-900 pounds.

**Relocate:** Usually not practical due to weight and site preparation.

**Heat:** Separate heating element is expensive to operate and replace. Monthly cost approx. \$30-\$130.

**Thermal Lid:** 2" to 3" above surface of the water. May be an accessory.

**Jet Power:** Hydrotherapy often uneven due to number and configuration of jets. Sometimes overbearing strength.

**Safety / Comfort:** Must use caution with slippery surface and hard corners. Dangerous hidden depths. Similar to hard floor or tub.

**Seating:** Molded plastic "assigned seating" restricts activity and positioning.

**Usage:** Necessity of time to heat water means loss of spontaneity.

**LED light:** Additional cost – if available.
