

Information Systems Engineering (ISE) Completes Asset Purchase of Systems Group Incorporated (SGI)

ISE Expands Customer Base and Manufacturing Technology Integration Services Footprint with Strategic Acquisition

Milwaukee, WI - Information Systems Engineering (ISE), an award winning IBM Business Partner systems integration company and Certified Infor Channel Partner providing advanced manufacturing and business information systems for over 25 years, today announced the strategic asset purchase of Systems Group Incorporated (SGI) based in Itasca, IL, an integrated IT solutions company comprised of professional services and consulting, application software, and infrastructure. With the acquisition of SGI, ISE adds approximately 60 additional customers and additional staff members to its team.

“We are pleased to serve former SGI customers and look forward to exploring ways to help them further improve manufacturing and business technologies that will help them advance to the next level,” said Brad Spaits, ISE President. “Many of our existing customers have been relying on ISE for over 25 years and that longevity is attributed to our track record in helping them succeed as our valued business partners. ISE is dedicated to helping our new partners to succeed in a similar fashion.”

The acquisition was completed on September 7, 2016. ISE will integrate the existing consulting, programming, executive and sales teams into its operations and intends to operate out of ISE's Pewaukee, Wisconsin office in the Riverwood Corporate Center. ISE's consultants will continue to serve customers wherever they may require services.
