Environmental Field Technician

Since 1998, Envirocheck, Inc. has been a leader in the environmental testing and consulting industry. This would not be possible without a knowledgeable and dedicated team. At Envirocheck, Inc. we value hard work and encourage our crew to go above and beyond the call of duty. The environmental industry is constantly evolving, and our team is always up to the task by continuing our education and developing to meet our client's needs. Do you have what it takes to join our ever-growing team?

Job Description

Our field technicians provide clients with advice regarding potential contaminant presence in a variety of settings including residential, commercial, and industrial buildings. The ideal candidate should be an individual who is self-motivated, this "hands-on" position requires strong analytical and communication skills to identify a potential issue and convey said issue to a client with remedial solutions when necessary. Through on-the-job training and certification courses, field technicians gain knowledge regarding state and federal regulations and in turn conduct surveys and produce reports as a knowledgeable party. As knowledge and experience increase, additional certifications may become available.

Responsibilities include:

- Conduct on-site inspections, which includes documentation of site conditions, sampling, and in-person consultation
- Produce professional survey reports based on inspection notes and sample data with remedial recommendations as necessary
- Coordinate with multiple parties regarding inspections while keeping all parties best interests in mind
- Adhere to all applicable state and federal laws and regulations and communicate that information to clients in a professional manner

Qualifications & Skills:

- Seeking an entry-level and/or experienced and certified consultant to perform fieldwork, physical on-site inspections, investigations, report writing, etc. pertaining to Asbestos, Lead, and/or Mold.
- Prefer individuals with a bachelor's of science degree in biology, chemistry, environmental science, and/or related science, certified asbestos consultant (CAC) and/or certified site surveillance technician (CSST), Lead sampling technician, or CA_DHS lead inspector/assessor.

Full Time Employee Benefits:

- Health Insurance, Dental Insurance, 401K

Positions Available:

- Entry-Level Technician
- Senior-Level Technician (with applicable experience / certifications)
- Project Manager
