(405) 330-5030  
(405) 948-7172

**FLEA DISCLOSURE**

In order for a flea treatment to be effective and qualify for a 90 day warranty, we require the following be done:

- leave the property for two hours following the initial treatment
- vacuum once daily and either dispose of the vacuum bag **each day** in an outdoor trash dumpster, or wash the canister thoroughly with very hot water
- get any and all animals professionally treated for fleas the same day of the initial treatment and wash pet bedding before the animals return
- do not mop in areas where chemical has been sprayed for 14 days following each spray
- successfully schedule a follow up within 10-14 days of initial treatment

The cost of the treatment includes any follow-ups necessary within 90 days of treatment as long as these four conditions are met. However, if no follow-up is done within 14 days of initial treatment, the warranty will be immediately voided. Please do not hesitate to give us a call at (405) 330-5030 should you have any other questions or concerns.
