

D&L Timber Technologies Ltd has introduced a new swing blade model. We have been asked consistently for a commercial diesel model housing our 180 degree swing blade. Well here it is. We happy to announce the D&L 12” commercial 180 degree swing blade with a 46 hp Kubota diesel. This mill model houses hydraulic feed works, set works and a hydraulic swing. We combined the 2 technologies using our robust frame and lift system of the twin saw model with the original D&L 180 degree swing blade. This is a heavy duty mill that is ready for the serious commercial entity.

## Specifications

	<b>10x20</b>
<b>Power unit</b>	<b>30 HP</b>
<b>Log Length</b>	<b>21’</b>
<b>Log Diameter</b>	<b>42”</b>
<b>Trailer</b>	<b>Optional</b>
