12 August 2022

INFLATION CLIMB 8.5% IN JULY AS PRICES COOL BUT REMAIN NEAR RECORD HIGH

The Labor Department said Wednesday that the consumer price index, a broad measure of the price for everyday goods including gasoline, groceries and rents, rose 8.5% in July from a year ago, below the 9.1% year-over-year surge recorded in June. Prices were unchanged in the one-month period from June.

So-called core prices, which strip out the commodity measurements of food and energy, climbed 5.9% from the previous year, below the 6.1% forecast from economists but matching the reading from July. Core prices rose 0.3% on a monthly basis – a smaller increase than in April, May and June.

Scorching-hot inflation has created severe financial pressures for most U.S. households, which are forced to pay more everyday necessities like food and rent. The burden is disproportionately borne by low-income Americans, whose already-stretched paychecks are heavily impacted by price fluctuations.

Although American workers have seen strong wage gains in recent months, inflation has largely eroded those. Real average hourly earnings decreased 0.5% in July from the previous month when accounting for higher consumer prices, according to the Labor Department. On an annual basis, real earnings actually dropped 3% in July.

STRATEGICALLY FOR CREDIT UNIONS

There was some real reprieve for U.S. households last month in the form of lower energy prices, which contributed to the decline in headline inflation. The cost of energy fell 4.6% in July from the previous month, though it remains 32.9% higher than just one year ago, while gasoline prices fell 7.7% in July. They remain up 44.9% from last year.

However, other price increases were extensive in July with inflation remaining stubbornly high. The food index climbed 1.1%, putting the 12-month increase at 10.9%, the highest since May 1979. Consumers paid more for items like cereal, chicken, milk and fresh vegetables.

The average American is shelling out an extra \$717 a month because of the hottest inflation in decades. The financial squeeze stems from the rising cost of a number of everyday goods, including cars, rent, food and health care.

Even if prices stopped increasing altogether, the inflation that already occurred between August 2021 and July 2022 would cost the average American household an extra \$8,607.

Although American workers have seen strong wage gains in recent months, inflation has eroded those entirely. Real average hourly earnings actually decreased 0.5% in July from the previous month when accounting for higher consumer prices, according to the Labor Department. On an annual basis, real earnings actually dropped 3% in July.

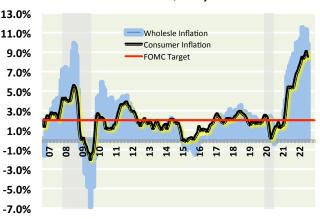

ECONOMIC RELEASES

| RELEASES THIS WEEK: | Current | Projected | Previous |
