

"Out of State" DUI Assessments in Partnership with NTSI (San Jose, CA)

DUI arrests from outside of California frequently require a comprehensive drug and alcohol assessment administered by a certified counselor. For some US States, this assessment must be conducted prior to enrolling in a program. The assessment is used to determine the level of program services required to clear your driving record in that State.

“CADC Services” provides this service using nationally recognized assessment methods and the [ASAM Criteria](#) for Substance Use. Assessments are also provided for any individual privately requesting this service for court, employment or any other drug or alcohol legal charges. Upon completion of the assessment process referrals will be given to the client for DUI Programs and/or Agency's, based on the nearest location. *(Urine Drug Screenings are also available to meet some out of state requirements)*

Call us to schedule an assessment.*(please allow approximately 1½ hours for the appointment)* **Please bring all documents, correspondence, and any other legal paperwork you have from the state where you received your DUI. You will also need to bring current legal identification (State issued ID, Passport, etc.)**

****The California DMV H-6 printout is helpful and can be obtained from any California State DMV office. (Not Mandatory for Out-of-State Intake) Please call for additional information at: 650.669.1578**
