Log #20 Page #1**

19th Visit with Darlene Jones, 440 Pequawket Trail, concerning her plans to renovate garage cellar into a “duplex type residence” for her aged father. Plans fit into land use requirements, but the septic may be a problem. Property folder had no SSWD record and it was determined that the property was first developed in about 1973. State form #HHE-237, record search request for SSWD, stops at the date of July 1974. .

20th Site walk for D & D Oil, Rt. #113. Dale Verrill had staked out the area representing the location for oil storage tanks. A follow-up of the site walk will be discussed at the May 25th review.
