

# THE MEXICA MARTIANS

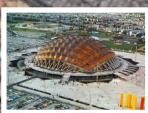

## CELESTIAL OCCULT SIGNATURES

The purpose of this illustration is to ascertain the approximate configuration of the Martian motif of the *Face of Mars* complex on the Mexican basin of the nation's capital city. As with most ancient and modern world capitals, this study suggests that the layout of the city approximates and/or has a direct correspondence to the ley-lines of the Pleiadian pyramid city complex on *Cydonia, Mars*. Many believe that there existed a pre-Adamic race not only on Earth with such fabled places as *Atlantis* but that the Earth's civilization had direct contact and was subject to a colonization of cultures and other-world civilizations on other heavenly bodies such as Mars, the Moon, etc.

As to the specific Mexica Martian motif that marks-off the Mexica capital, the following is suggested. The lay-lines are approximately reversed and rotated about 45 degrees from the Cydonia template. This motif is very simple; it consists of the 7 pyramid city structures, the D&M pentagon giant fortress pyramid. Then there is the famous *Face of Mars* that is purported to be the mausoleum of the fallen King of Nibiru, Ala-lu. The give-away sign of what the *Face of Mars* would correspond to on Earth is easy to ascertain given that in modern times, most of the Luciferian city planners use a racing track of sorts to depict this. In the case of Mexico City, it is its famous *Autodromo* where they have the Formula 1 races, etc. The track though is rotated by the 45 degrees offset. Another sign is that adjacent to the *Face of Mars*, there is a circular or round structure. Such is the case with the *Autodromo*, there is the *Palace of Sports* dome complex next to it. The D&M giant pyramid usually will correspond to a fortress of castle of some type.

Plaza de Los Deportes

AUTODROMO  
'Face of Ala-lu'

The next observation is that the Zocalo or the Aztec plaza was and is in the direct ley-line to the place of the 'Pleiades'. Apparently, even where the *Temple Major* was situated to correspond to the actual ley-line of *Cydonia, Mars*.

Meeting of Cortez & Montezuma on Causeway

The 3rd aspect of the Martian motif is that of the Pleiades motif. In other world capitals, such an array of the 7-stars are associated with city street roundabouts or monumental squares, etc. In the case of Mexico City, this area corresponds to the Country Club Park.

Other aspects to consider in this observation of the Mexica Martian motifs is that the *hexagram* that is constructed by the triangulated motif has the center point approximately where the place was situated when Cortez officially met Montezuma on the actual causeway.

Chapultepec Castle

Puma Landsculpture

This is the case with Mexico's *Chapultepec Castle*. The delineation of the area does appear to be in a 5-sided array. The triangular grid does also point to the center direction as in the case of Mexico City and Mars. It is commemorated with an All-Seeing Eye of Horus type of pyramid by way of the street layout. What is unique about the castle is that it makes-up the 'mouth' of the 'Crouching Puma' that the mountainous ridge portrays from the air. The 'eye' would correspond to the world famous *Anthropological Museum* where the Aztec *Calendar* is housed.

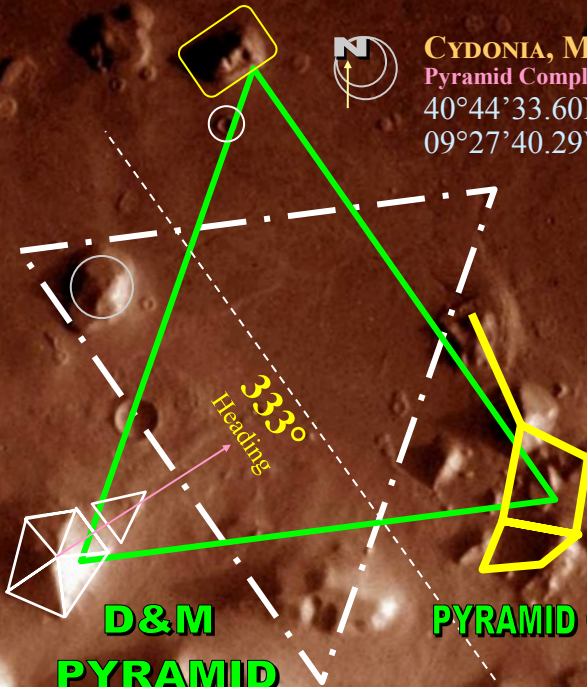

The castle is also the only one in the New World that was occupied by actual Royalty; that of the Hapsburg Maximilian of Austria. This was in essence one of the 13 Luciferian Bloodlines that rule the world through its banks and the debt policies of the *Money Changers*. The area just north of the castle is where the Masonic Lodge of Mexico is situated, etc.
