

ARE YOU GETTING THE 'VACCINE'?

QUESTIONS REGARDING COVID-19 SHOTS

Video Illustration

Transcription by Luis B. Vega

vegapost@hotmail.com

www.PostScripts.org

The purpose of this report is to provide a written transcription of the video that illustrates in a very effective way the questions that should be asked about taking the COVID-19 Injection. The video is believed to be sourced by a Wes Rhinier from NC Renegade website but is in the Public Domain as it is not copy righted. If the Author wishes to be credited and sourced, please contact for proper recognition. Certain words will be capitalized for emphasis and numbers 1-10 will be numerated. A list of online sites where the video is mirrored will be provided in the endnotes.

A reason why this video is worthy of a transcript is that the video will most likely be banned as it is so effective in explaining the dangers of the new Experimental mRNA COVID Injection. This being the case, this illustrative type of presentation could be very effective in reaching-out to the younger generations. After researching the COVID crisis since it began, one can attest that what the video touches upon, is exactly what should be highlighted as the main topics of discussion the General Public ought to be having. Unfortunately, this is not the case.

They say, 'The only THING that will save us is the VACCINE!' The Government, Media...Celebrities are using 'Fear' to force you into taking something you may not be sure about. They expect you to roll-up your sleeve and do something to your body that cannot be undone. I do not know about you, but we have a few questions. So, we are going to answer them.

1. Is the Vaccine Safe? No.

According to the FDA, (U.S. Food and Drug Administration) their list of Possible Adverse Event Outcomes, AKA (Also Known As) Side Effects from the Vaccines includes:

- Guillain-Barre Syndrome
- Acute Disseminated Encephalomyelitis
- Transverse Myelitis
- Encephalitis
- Myelitis
- Encephalomyelitis
- Meningoencephalitis
- Meningitis
- Convulsions/Seizures
- Stroke

-Narcolepsy and Cataplexy Anaphylaxis
-Acute Myocardial Infarction
-Myocarditis
-Autoimmune Disease...

Woe, these are far too many. We do not have time for these. Kind of makes you wonder. These attested injuries are already being reported. But rarely by the Main Stream Media. The U.S. Government's [VAER Database](#) (Vaccine Adverse Event Reporting System) is collecting 'some' of the reports. People are having Cardiac Arrests, Respiratory Arrests, and other Severe Reactions. You can look-up these reports for yourself. This is just a sampling. There are already tens of thousands!

Other Governments are also collecting this information. Like this recent report from Norway. 23 Deaths associated with COVID-19 vaccination of which 13 have been assessed. These are all the immediate Side Effects. What about the ones that may 'kick-in' within a year, 5-years, or 10-years down the road? And what about Long Term Effects that are passed from Parents to Children? No one knows.

Since these Injections are making some People sick, it is no wonder that the CEO's making these Experimental Injections ran to Congress and got total 'Indemnification' from Liability through something called, [The Prep Act](#) (Public Readiness and Emergency Preparedness Act). This means that if you get the shot, and that shot injures or kills you, the Company that made the Injection cannot be made responsible.

2. So, why is the Injection making People sick?

Maybe because of what is in those syringes. It is 'Experimental' and you are the 'Lab Rat'. You see, nothing like this has ever been used before. This is NOT a vaccine. A vaccine is where a Microorganism such as a virus is pumped into the body in a small dose. So your Immune System can respond and begin to make Antibodies. That is the theory anyway. But this is not what these shots do.

This is an Experimental Injection and if you get it, Congratulations! You are part of the biggest mass Human Experiment ever! Because what is in that vaccine is any more than this Giraffe in the sea is a fish. So, what is it? Here is the idea, This is your body. Your DNA tells the body what to do. The mRNA is the 'Messenger' that delivers the Instructions from the DNA to the rest of your body. What they are going to pump into your arm a Synthetic mRNA.

Once the syringe is done squeezing all that Experimental 'Juice' in you, these tiny Nano-Particles will punch holes into your cells and carry into your cells the mRNA that was made in a Lab. Once in your cells, they will instruct your body to make part of the COVID-19 Virus. It is like 'Hacking a Computer'. But instead of a computer, they are hacking into your body to make part of a virus.

The COVID Injection bypasses your DNA, the same way a Hacker bypasses the Security Fire Wall of a computer. The Computer Hacker spreads a virus. The 'Injection Hacker' makes part of the virus. But you are not a machine.

So, how can you be sure that it is safe and that the only 'Code' they are uploading to your cells is the Code supposedly to fight COVID-19? Next question.

3. Who loves Chemicals?

Well, get ready because they are coming to a syringe near you! Pfizer's version of the COVID Injection contains a number of 'Experimental' and Industrial Chemicals including:

-ALC-0315

A positively charged molecule that helps the Nano-Particles form. There is also something called:

-DSPC and Potassium Chloride

-Monobasic Potassium

-Phosphate

-Sodium Chloride

-Dibasic Sodium

-Phosphate Dehydrate

You can find some of these in the Ingredients in your favorite bag of Fertilizer. Uhm-Uhm, cannot wait to have that in me.

Now, let us look at the Mode(ify) RNA or the Moderna Injection. Their shot contains similar substances. And they also throw in a drug called Tromethamine. Because? Why? Do you not have the right to know what is exactly being injected into your body? And whether or not it is safe?

4. Has the Experimental Injection been thoroughly tested? **No.**

The FDA's [Vaccines and Related Biological Products Advisory Committee](#) decided to approve this Experimental injection for 'Emergency Use'. [Arnold Monto](#), presided over the Committee. Let us give a listen to see how thorough he was to approve a vaccine for the entire country.

I completely agree...

Arnold Monto: Very quickly!

My 1st Question...

Arnold Monto: I said 1 part only.

Well, I am going to put up my hand up again then.

Arnold Monto: Hu, then you will go to the bottom of the queue.

Arnold Monto:

We really need to keep it... we need to keep it brief.

Let us keep the answers relatively short.

That is a very big question.

We are not going to worry about Adaptive and Innate Immune Responses right now.

*We will take that offline.
I am going to excuse Dr. Fink from having to answer that part of the question.*

I think we want to stay away from discussions about Immune Response and other things that could be taken offline.

And therefore, our work for the day is done.

Pretty thorough huh? Side note, he has received money from Pfizer as recently as December 2018. Those that are supposed to keep you safe felt it unnecessary to see how the Injection affects your Brain, Kidneys, Lungs or Heart.

SLIDE: If data from other studies suggest that the vaccine may affect physiological functions (Central Nervous System, Renal, Respiratory or Cardiovascular System Functions), safety Pharmacological Studies should be incorporated into the Toxicity Assessment. This does not apply for COVID-19 mRNA vaccine BNT162b2.

- No studies were done to see how the Injection reacts with other drugs that you may be taking.*
- No Toxicity were done on a single dose.*
- No Toxicokinetic Studies were done to see what happens once they get into your body.*
- No Genotoxicity Studies were done if these Chemicals will damage your DNA.*
- No Carcinogenicity Studies were done to determine if these substances will cause Cancer.*

*-They have **No** idea if this is safe for Pregnant Women.*

-No studies were done on how the Experimental Injection affects pre-Natal and post-Natal development in Moms or Newborns.

-No studies were done to see what happens when Couples get the Injection and any subsequent Children they may have also received the shot.

Look at all those No's!

5. Is the Experimental Injection effective? **Another No.**

Ask yourself, if the so-called vaccine is effective, why are they still requiring you to wear a Mask after you have been 'vaccinated'? And why have some People gotten COVID after being injected? Have you seen the headlines?

Well, the Clinical Trials for the Pfizer Experimental Injection did not demonstrate that the shots stop any of the following:

- Getting COVID.*
- Getting very sick with COVID.*
- Or being Hospitalized because of COVID.*
- Or Transmitting COVID to others.*

All the Clinical Trials proved was that the Injection reduced the Mild COVID-19 Symptoms, like Coughing or Muscle Pain. That is it. How do we know this? Pfizer, the Manufacturer tells us.

SLIDE: 'COVID-19 was defined according to the Food and Drug Administration (FDA) criteria as the presence of at least 1 of the following Symptoms: Fever, New or Increased Cough, New or Increased Shortness of Breath, Chills, New or Increased Muscle Pain, New Loss of Taste or Smell, Sore Throat, Diarrhea, or Vomiting.'

Now for Moderna. According to the FDA:

- They do not if the Moderna Injection will protect People for more than 2 months.
- They do not know if it will provide any benefit for People who have already testing Positive.
- They do not know if the Injection will stop People from dying of COVID.
- They do not know if the Injection prevents the virus from being Transmitted from person-to-person.
- They do not know if the Injection will be safe for a large percentage of the population.
- They do not know if the Injection will make getting the disease even worse.

I think the theme here is, 'They do not know'. And since they are pushing this Experimental Injection on us, as some sort of an 'Emergency'...

6. There must be no other safe and effective Treatments for COVID-19? Right? Wrong!

Doctors have found safe and effective and inexpensive Treatments that work well in treating Patients with COVID-19, like Ivermectin. That has been used safely for more than 30 years. (Million doses a day, good safety profile) But the Government is not supported the use of this effective drug. In fact, there are other Therapies like Hydroxychloroquine, Vitamins D and C and Zinc that Physicians have found to be safe and effective in preventing and treating COVID. But the Government does not want them used either.

7. Is the Government silencing Doctors? Yes!

Critical voices from Doctors, Scientists, Nurses and other Health Care Professionals are being censored. Because if we already have effective Therapies against COVID, that would make an Experimental Injection totally unnecessary!

8. Do I not have a high chance of dying if I do not get the Experimental Injection? The answer is No.

According to the Government's own statistics, and good-ole fashion Math, your chances of surviving COVID-19 without the Experimental Injection depends on your Age Group.

- 0-14 Survival is 99.9998%
- 15-44 Survival is 99.9931%
- 45-64 Survival is 99.9294%
- 65-85 Survival is 99.6297%
- Over 85 Survival is 98.2499%

The numbers do not lie. In fact, your chances of being struck by lightning is about the same as you chance of dying from COVID. Do we need an Experimental Injection for potential Lightning Strikes? And by the way, remember that the so-called vaccine was not even proven to stop anyone from dying from COVID anyway?

But your chance of surviving COVID is even better these statistics. Why? Because the Case Counts and the Death Counts are inflated since the Government's COVID Tests are according to the leading Scientists, useless. The COVID Tests are based on [PCR](#). PCR (Polymerase Chain Reaction) was invented by Dr. Kary Mullis, who won the Nobel Prize for his invention and said on video, from his own mouth, his tests were never designed to tell you if you are sick. Let us listen.

'With PCR, if you do it well, you can find almost anything in anybody. PCR is separate from that, it is just a process that is used to make a whole lot of something, out of something. That is what it is. It is not...it does not tell you if you are sick. And it does not tell you that the thing you ended up with really was going to hurt you or anything like that.'

In addition, Anthony Fauci has indicated that most PCR Tests are being done wrong and finds Dead Nucleotides, not Infection Viruses. In other words, the Tests are supposed to find COVID when there really is no COVID. Let us listen.

'That if you get a Cycle Threshold of 35 or more, that the chances of it being Replication Confidence are miniscule. So, that if somebody, and you know, we do... we have Patients... and it is very frustrating for the Patients as well as for the Physicians. Somebody comes in and they repeat their PCR...and it is like 37 Cycle Threshold, but you never...you can almost never culture virus from a 37 Threshold Cycle. So, I think... if somebody does come in with 37-38, even 36, you just got to say, you know, it is, it is just Dead Nucleotides. Period.'

Dead Nucleotides. Period. Even above 36 Cycles? Interesting. Guess what the FDA approved? Up to 40 Cycles. That means, most of your Tests that are finding COVID are not finding COVID. But in Fauci's words, 'Dead Nucleotides', Fragments in the Environment. And finally, the former Vice President of Pfizer, one of the Company's making the Experimental Injection has called the PCR Test, 'Useless'.

So, if someone dies of COVID, and the COVID Test is useless, what are they really dying from? Probably the other Co-Morbidities. What is that? It means from other diseases according to the CDC. 94% of all COVID Deaths had an average of 2.9 Co-Morbidities. In other words, 94% of the People who supposedly died from COVID had on average about 3 other diseases that could have contributed to their Death.

Let us Recap...

Here is what we know. The COVID 'Vaccine' is:

- Not a Vaccine.
- It is an Experimental mRNA Injection that 'hacks' your cells and instructs your body to make part of the COVID-19 Virus.
- It was rushed through Clinical Trials.
- Skipped proper Safety Testing.
- And is already causing a long list of Side Effects.
- People are already getting sick and dying from it.
- The Injection was not proven to stop People from contracting COVID, Transmitting the virus or from getting very sick.
- The complete list of Ingredients is unknown because the Drug Company does not have to tell us what is in their syringe.
- Drug Companies sprinted into Congress so they cannot be held responsible for when People get sick or die from their so-called vaccine.
- Ironically, there is 'Immunity'. The Injection-Makers are 100% Immune from accountability.
- Safe, effective and proven Therapies for COVID exist and are being ignored and censored.
- The number of COVID Cases and Death Counts are wildly exaggerated because the Tests on which they are based are useless.

The Truth is, none of us really know. Why the Lockdowns? Why the Inaccurate PCR Testing? Why inflate Case and Death Counts? What is up with the rampant Censorship? What is the real Agenda here?? We do not even know what is in those syringes and what will happen to you once that Experimental Injections gets inside your body.

No one knows. But what we do know is that once it is in there...you cannot get it out. Do not be bullied into taking a shot that you can never undo. If you want to learn more, go to our resource page and remember, IT IS YOUR BODY, AND YOUR LIFE.

YOU GET TO DECIDE.
