

JOB DESCRIPTION

Job Title:	Flow Cytometry Technologist
Division Name:	Operations
Location:	Houston – Main lab at 1140 Business Center Dr.
Status:	Full Time Employee
Shift:	Tuesday-Saturday AM
Relevant work experience:	2+ years related work experience in a high complexity laboratory where sufficient personal responsibility and teamwork can be demonstrated. Strong hands on bench experience with sample processing, manual assay performance and complex analysis in a flow cytometry testing environment is highly desirable.
Education:	Undergraduate degree in Medical Laboratory Science, Biology, Immunology, or other Life Science discipline preferred, and specific certification as required.
Reports to:	Applied Diagnostics Flow Cytometry Supervisor
Position: <i>General description</i>	The flow cytometry technologist will carry out sample preparation for high complexity leukemia/lymphoma immunophenotyping and provide preliminary analysis to pathologists. Individual must undergo additional training and achieve certifications required by the lab to perform new tests according to all the policies and procedures provided by Applied Diagnostics.
Division: <i>General description</i>	Operations includes all technical work done in the lab in preparation for pathologists to review the workbook (slides, images, readings etc) and render a final report. It also includes logistics, software management, and all other activities required to run the business but not including commercial, medical or administration.
COMPENSATION:	Hourly (competitive based on experience)
CONTACT:	Sarah Cocris Supervisor, Flow Cytometry Houston, Texas TEL: (713) 271-4133 Sarah.Cocris@applieddiagnostics.com
