Land Surveying in Colorado for over a decade. In 2010 I started a South Boulder based firm capable of providing any type of Professional Land Surveying service, including any of the Surveying related documentation to assist in the Oil and Gas Development Process. We specialize in Boundary Establishment, Design Data documentation, and Construction layout. I will be personally involved with all aspects of the survey process to quickly produce high quality, repeatable, and reasonably priced products that can be relied upon to stand the test of time.

Solar and Wind Surveying Services:

- Land Survey Plat
- Recorded Exemption
- Topographic Surveys
- Legal Descriptions
- Lease Area Exhibits
- Area Calculations and Reports
- Site Location Certificates
- Right of Way Establishment
- Easement Descriptions and Exhibits

Construction Services:

- Proposed Pad Site Staking
- Proposed Road Staking
- Proposed Transmission Tower Staking
- Plot Plan for Proposed Improvements
- As Built Surveys
- Volumetric Analysis and Reports

Dear Prospective Client,

As a professional Land Surveyor in Colorado I have managed a wealth of surveying projects and delivered products for any application. I have extensive experience in Design Surveying, Project Management and Construction Management with Hundreds of Millions of Dollars in Improvements designed and constructed under my Surveying Supervision without a single back charge.

I have managed some of the largest and most complicated Surveying Projects in the State, including the dependant re-surveys of Sections, Township and Range Lines, United States Mineral Surveys, Homestead Entry Surveys, Highway and Railroad right-of-ways, National Forest Boundary Establishment, layout of the Structural Steel for the Denver Bronco Stadium, layout of many commercial buildings and hospitals, Design Survey documentation and layout for many miles of Pipeline projects and Proposed well sites.

I was first taught to use a Computer Aided Drafting program while taking a drafting class in high school. These skills were applied to the course work required to obtain my B.A. in Geology from San Francisco State University and have been expanded upon to meet the needs of my professional career. I have more than twelve years of experience with AutoCAD® software for the use in Survey Drafting and Data Analysis. The drafted and paper products that I deliver are first rate.

Approaching 20 years of experience with GPS I was first trained to post process Global Positioning System data in the mid 90's while working on Sedimentation Studies at San Francisco State University. As a Professional Land Surveyor I have had the opportunity to manage GPS data from all over Colorado and as far abroad as Guam. I have the ability to generate "Control" quality data using many different methods. Including the relation to regional NGS published control information, the utilization of CORS and OPUS solutions to post process positions, and the use of established "Networks" when applicable. The spatial relationships that I generate can be related to any provided coordinate system.

I began surveying in Boulder, CO with Flatirons Surveying in 2000. At Flatirons I quickly became a Senior Project Manager, was involved in the training of new staff members, led teams of up to 10 people to almost every corner of the state and successfully accomplished many of their most difficult projects on time and within budget.

I expanded upon my undergraduate degree in Geology with post graduate studies of surveying techniques and boundary law at Metro State University Denver, where my education and professional experience led to proctoring lab exercises and a position as an Adjunct Professor of Route Surveying.

In 2010 I established Green Mountain Surveying as an alternative to the larger surveying firms. I believe that all aspects of any surveying product should be overseen by a Professionally Licensed Land Surveyor. My personal contact and attention to the particular needs of each project ensures that all of the client's needs are exceeded. This allows for quick response to questions fast turn around and allows me to produce a highly repeatable, superior product at an exceptional price.

Please contact me for an estimate on your next surveying related project. It would be my privilege to provide all of your project surveying needs.

Thanks for your time and consideration,

Sam Knight, P.L.S., C.F.E.D.S., Owner
