Product**

The key to your daily automation needs

Our goal is to make you more productive. From actuators to accessories for factory automation as well as process automation - you can reduce procurement complexity for both the electric and pneumatic control chain.

At the same time, we work consistently on our production and delivery capacities worldwide to ensure that you receive the products you ordered promptly, even in large quantities.

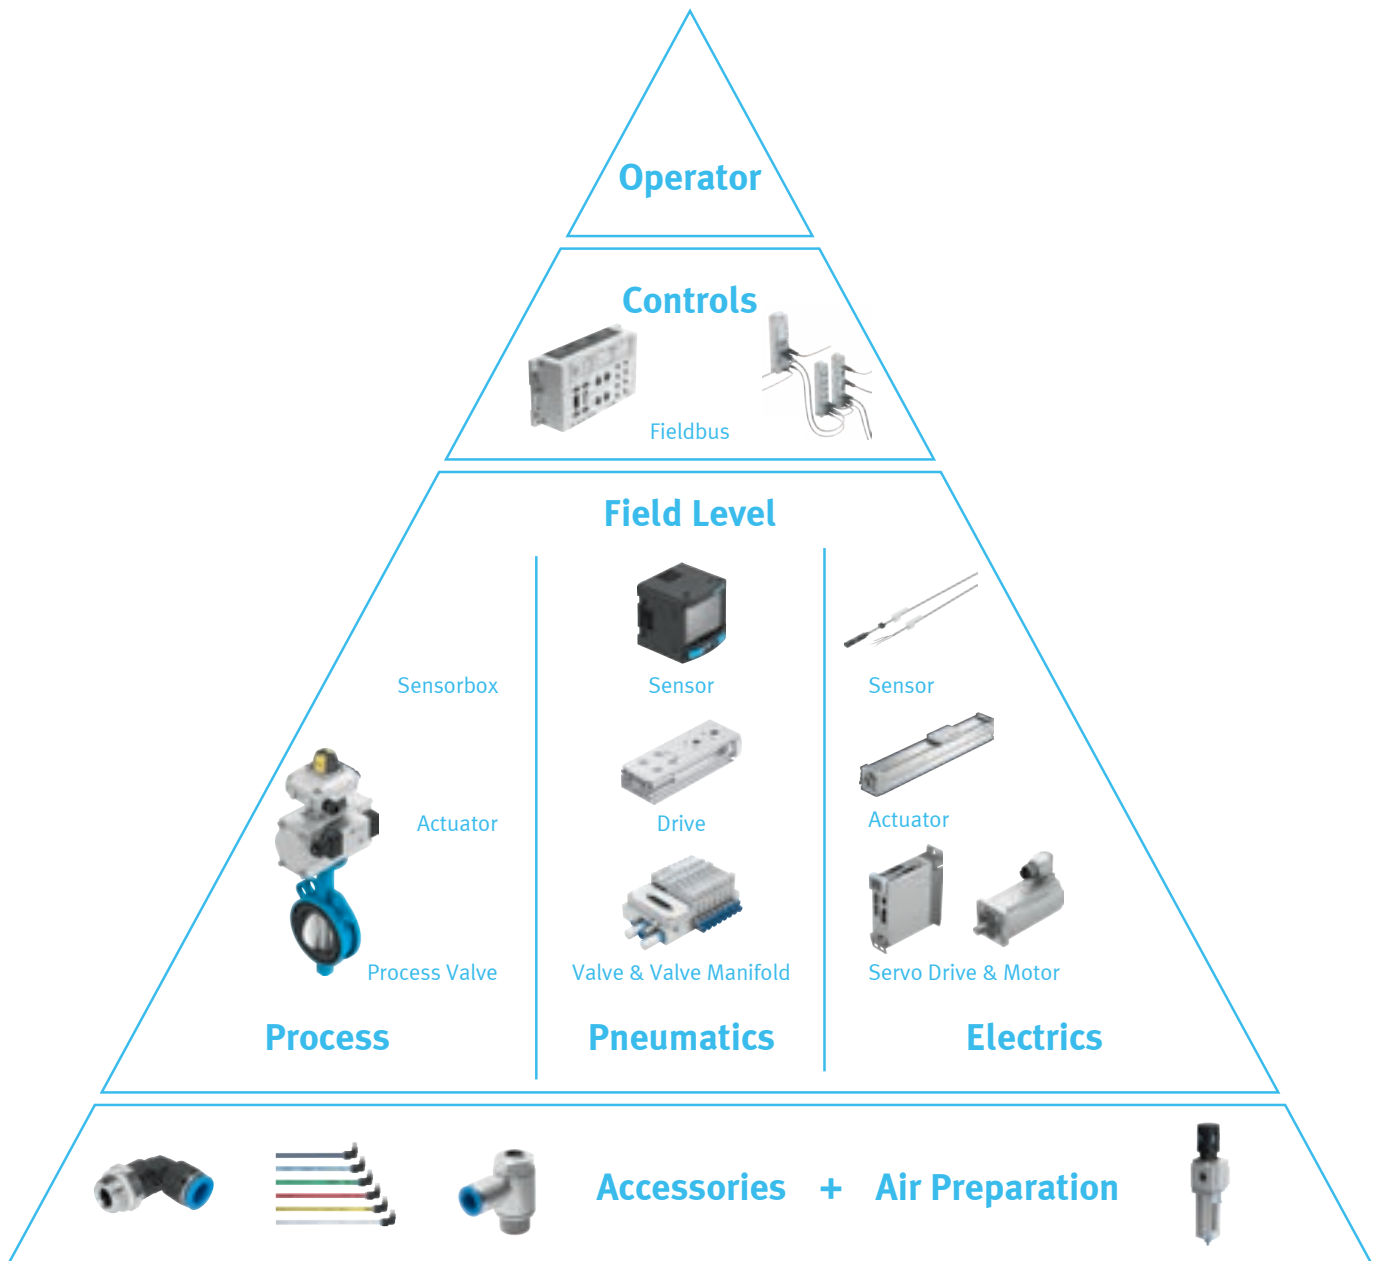

A simplified product selection.

Check out our new Festo Online Shop!

You are looking for cost-effective automation?
You need short delivery times?
We deliver large quantities fast and worldwide.

PLC/Modular/Motion/Robotic Controller CPX-E

- CPX-E is a high-performance controller for automation system focusing primarily on motion & robotic controls
- Multi protocol connection widely available
- Extended software functions for seamless integration and simplified control of electric drives
- The following modules are available:
 - PLC/Motion/Robotic Controller
 - Multi Protocol bus Interface modules
 - Input/output modules
 - IO-Link master modules
 - Encoder Module

Distributed Remote I/O system CPX-AP-I

- IP65/IP67 Remote I/O system brings input/output controls closer to equipment or process, no electrical panel is needed to mount CPX-AP-I module
- Cost effective remote I/O system with up to 80 freely combinable modules/valve terminals per bus interface, up to 50 m between every module
- Easy to adapt to difference control system by exchanging the bus interface
- Realtime capability
- Extremely easy to assemble & integrate
- The following modules are available:
 - Multi Protocol bus Interface modules
 - Input/output modules
 - IO-Link master
 - Interface to the valve terminal

Valves

Valve VUVG

- Highest flow-rate in the market for M5 & G1/8
- Providing fast air delivery and efficiency
- Bigger manual override screw button with multiple accessory options
- Hassle-free with captive screws which help to reduce downtime
- Light weight & high reliability spool giving safe operation
- Fast switching time with air-return spring
- For areas of applications where limited mounting space is required
- Better visibility for improved safety
- Multiple manifold options for in-line and sub-base design options
- Defined compression with built-in step

Used in textile machine for fast speed production of button hole

Gentle placement of large metal sheets from a transport system to a stack by multiple cylinders

Individual valves VUVG-...-S

- Connection M5, M7, G1/8, G1/4
- Flow rate 180... 660 l/min
