DATA SHEET

Mouse Anti-p53 [DO-7]: MC0219, MC0219RTU7

Intended Use: For Research Use Only

Description: p53 acts as both a tumor-suppressor and transcription factor that, upon activation by DNA damage and other cellular stress signals, leads to the transcription of genes triggering cell-cycle arrest, apoptosis, and DNA repair. p53 is overexpressed in over 50% of human cancers. Positive staining of p53 detected by immunohistochemistry has been observed in colon cancer, breast cancer, lung cancer, prostate cancer and ovary cancer.

Specifications:

Clone:	DO-7
Source:	Mouse
Isotype:	IgG2b/κ
Reactivity:	Human, mouse, rat, cow, monkey
Localization:	Nucleus
Formulation:	Antibody in PBS pH7.4, containing BSA and ≤ 0.09% sodium azide (NaN3)
Storage:	Store at 2°- 8°C
Applications:	IHC, Flow Cyt, ICC/IF, IP, WB

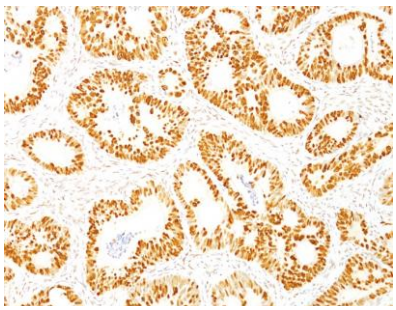
Package:

Description	Catalog No.	Size
p53 Concentrated	MC0219	1 ml
p53 Prediluted	MC0219RTU7	7 ml

IHC Procedure*

Positive Control Tissue:	Breast cancer, colon cancer
Concentrated Dilution:	50-200
Pretreatment:	Tris EDTA pH9.0, 15 minutes using Pressure Cooker, or 30-60 minutes using water bath at 95°-99°C
Incubation Time and Temp:	30-60 minutes @ RT
Detection:	Refer to the detection system manual

* Result should be confirmed by an established diagnostic procedure.



FFPE human colon carcinoma stained with anti-p53 using DAB
