

Description

The MVZ – 300– is an economical thermoformer with has strength and flexibility. It is a “Workhorse.”

It carries out a complete packaging process and provides products with a long shelf live. This hygienic packaging system is suitable for small and large - scale packaging. Preheating plates , forming mold, filling station , vacuum unit gas injection station, sealing and cutting station are the main units of the machine. Transportation of the packing film is carried out by an extra strong regina-grippng chain. This machine requires minimum maintenance and works without noise and failure. The robust chassis is made of 304 S/S.

The MVZ – 300 offers you a more comfortable working environment with a servo motor for digital advancement, a state- of the art PLC control system which allows for monitoring of parameters and necessary adjustments to be made easily and a large touch screen operator panel.

Quality

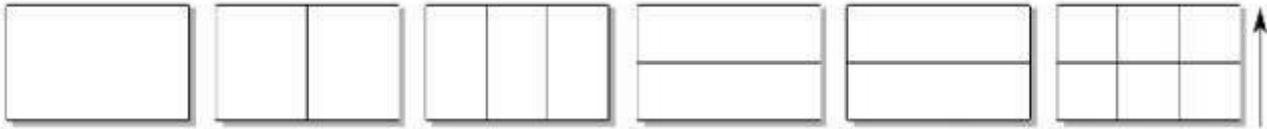

Each mechanical part, forming modules, sealing plate special shaped cutting systems ect. is EUROPEAN made and manufactured.

Parts

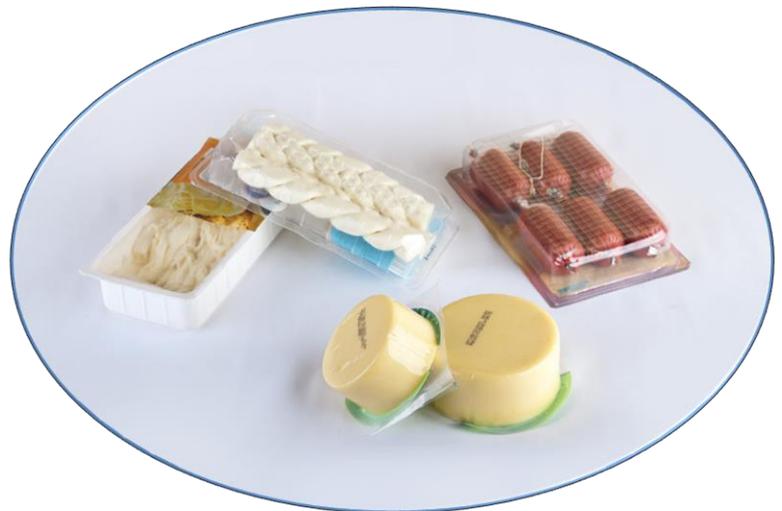

Most components and spare parts are available on the open market.

Economical machine for thermoforming packaging

Model MVZ - 300

The **MVZ – 300** can help you boost production and save money. Loading open, horizontal packages is easier as compared to other vacuum packaging machines. The machine can complete up to 10 cycles a minute. You can create virtually any package configuration you need and easily change between them by swapping tools. Automatic sealing and cutting and the ease of filling packaging can reduce the workers you need while boosting your output. Reduce costs and maintain productivity by enabling remote troubleshooting and monitoring to help keep machines running.

Specifications	Data	Application
Capacity	7 – 10 cycles / minute	Cheese Varieties
Base Film	(PA + PE) (PVC+PE) (PET+PE)	Olive
Lid Film	(PA+PE) / ALU (Paper + PE)	Meat
Max. Depth	125 mm	Chicken
Bottom Film width	320 – 460 mm	Sea Food
Top Film Width	315 – 455 mm	Dairy Deserts
Electrical Consumption	14.5 KW / 380 V	Cake
Compressed Air	6 – 8 bar / max. 1200 l / minute	Pastries & Bread
Cooling Water	12 – 16 °C – 6000 Kcal / hour	Medical Products
Machine Dimensions	8000 x 1800 x 2000 mm	Salami
