

TETRAD OF THE CRUCIFIXION - 32 AD

The purpose of this illustration is to highlight the array of both Solar and Lunar types of Eclipses from 32 AD to 33 AD. The timeline will appear to demonstrate that there are several Astronomical Patterns that involve such Eclipses. They will be either Total, Annular, Partial, Blood, Hybrid types. There will also be several clusters that occur such as Tetrads, that being 4 Consecutive Total Lunar Eclipses or Triads, that being only 3 Consecutive Total Lunar Eclipses. What the chart is suggesting, based on one's best Educated Guess is that the Crucifixion Year was in 32 AD. This Timeline is also predicated on the supposition that Jesus Christ was born in -3 BC. If this Day Count is correct, it would put the 2000-Year or '2 Days' concluding in 2032. If one then reverses the 7-Year of the Tribulation, the result would be 2025. Nevertheless, the Year Discrepancy suggests a Last Generation Scenario, if the Prophetic Pattern is in Play. Also note that the Tetrad, are based solely on the Rabbinical Calendar and why they fall on Feast Days of YHVH.

Note that the out of the 4 Blood Moons spanning 32 AD and 33 AD, only the Year 32 AD had their Blood Moons as Total Eclipses. And how the Month of Nisan for 32 AD started with a Solar Eclipse.
