SEFAR® PET 1500

The screen printing mesh professionals use

The screen printing mesh professionals use

SEFAR® PET 1500 is the best stencil carrier for an almost infinite number of screen printing applications – the most wanted for decoration of any printable substrate. SEFAR® PET 1500 is available in the largest range of different screen printing mesh types.

Mesh features	Screen/stencil maker benefit	Printer benefit
Unsurpassed UV-A light undercutting protection of yellow mesh	 Absorption range adapted to the UV-A radiation spectrum Sharp-edged reproduction of the artwork on the stencil Finest detail reproduction in stencil Wide exposure tolerance 	 Sefar yellow supports the printing of demanding tasks in which high resolution detail are essential High reproducibility of fine halftones and its gradients in print Best edge definition in print
Adhesion and preparation optimized mesh surface	 Homogeneous coating and constant application of emulsion Easy and secure capillary film application thanks to excellent wetting properties Compatible with all standard emulsions 	Extended screen lifeHigh quality image reproduction
Reproducible mesh relaxation	 The tension drop between the stretching and printing process is stable and low for subsequent print runs Process and product reliability 	 Better color to color reproduction Good reproducibility of fine details in long print runs
Good ink and paste release behaviour	 When bonding after the stretching process, adhesive passes good through the mesh, therefore less problem in bonding the mesh to the frame 	 Uniform ink application on large sized area prints Maintaining of tightest color shade tolerances High quality printing results in long print volume
Good antistatic behavior, thanks to Sefar antistatic treatment	 Simple, reliable and user-friendly screen production Reduced susceptibility to dust in the stencil production Reduction of retouching time 	 Production reliability thanks to reduced risk of electrostatic charge Error-free and clean printing Reduction of waste in the print process and increased production efficiency
Wide standard range with high availability	 Optimizing of storage management Short delivery time High reliability ensures continuous production 	Ensured continual delivery of stencilsUnlimited options of ink/paste film thickness
Manufactured to meet the highest industry standards	Process stability through consistent quality controlQuality you can count on	 High quality printing results Process reliability thanks to the best stencil quality Predictable results, no surprises on press

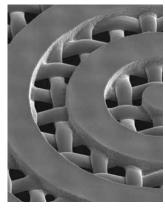

SEFAR® PET 1500

The screen printing mesh professionals use

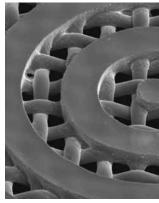

Unsurpassed UV-A light undercutting protection

commercially-available screen printing stencil systems.

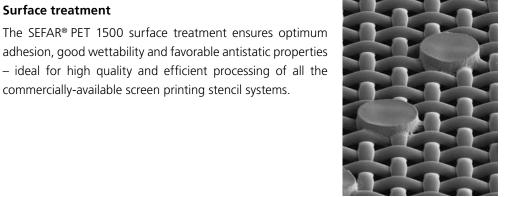

Sefar's propriatary mesh dying process allows for a large exposure latitude and the highest resolution of sharp edge stencil copy.

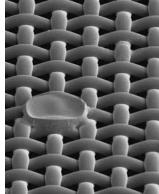

Undercutting protection of SEFAR® PET 1500 120/305-34Y

Undercutting protection of standard dyed polyester mesh 120/305-34Y

Stencil adhesion of SEFAR® PET 1500 120/305-34Y

Stencil adhesion of standard polyester mesh 120/305-34Y

Applications

Surface treatment

SEFAR® PET 1500 impresses with its performance in a wide variety of applications, ranging from graphic screen printing in small and large sizes, such as posters, displays, and signage; printing on plastics such as sporting goods, thermoformed parts, etc.; on the decoration of ceramic, directly or indirectly, and on up to textile printing and other industrial printing tasks.

Backlit posters with halftones higher than 30 lines/cm printed with SEFAR® PET 1500 165/420-27Y

For selected clear varnish on labels, printed with SEFAR® PET 1500 77/195-55Y

Intense metallic effects on sporting goods with SEFAR® PET 1500 90/230-40Y

Great detail reproduction on ceramic decals printed with SEFAR® PET1500 150/380-31Y

Mesh assortment

The SEFAR® PET 1500 range is available in a broad range of mesh types and widths. The mesh properties provide solutions for all types of screen printing applications. Choose the ideal screen printing meshes from our product portfolio for your printing needs. For specific advice on your application please contact your local Sefar sales representative.

Sefar worldwide

Sefar is the leading manufacturer of precision fabrics from monofilaments for the screen printing and filtration market. Sefar products are used in a wide variety of industries, reaching from electronics, graphics, medical, automotive, food and pharmaceutical applications to aerospace, mining & refining and architecture. With its profound understanding of the applications Sefar helps its customers to achieve optimum results in their industrial processes. Subsidiaries and fabrications centers in 25 countries on 5 continents provide local technical service for the broad range of solutions offered by Sefar.
