

Leprechaun Pocket Peeker

Give your students something a little bit different this year to keep them safe on Saint Patrick's Day. These pocket peekers will give them green and a little bit more—a leprechaun peering out from their pockets! You can use the colored versions or have the children color their own. Just print enough copies of page 2 OR 3 for the students in your class and separate the three little guys from each other. Have the children cut them out, cutting around the shapes and on the dotted lines, fold them together, and then fold back a little corner of the shamrock. Put a small piece of masking tape or duct tape on the back to keep them in the pockets and your little darlings will have leprechauns to play with all day.
