

## Aftercare Eyeliner

---

Schedule your follow-up for 4-6 weeks from initial appointment. It is your responsibility to schedule your follow-up. You may book your appts on line at [www.riseandshinepermanentmakeup.com/service-menu.html](http://www.riseandshinepermanentmakeup.com/service-menu.html) or text [832-544-1486](tel:832-544-1486) with 2 dates and times you are available.

**All tattoos heal, peel, fade and shrink.** Follow-ups and your outcome are determined by color chosen, skin tone, movement, shallow breathing, tense muscles, skin integrity, medications, medical conditions, technique and how your body accepts the pigment. **Aftercare** contributes to quality of your outcome, and the contract you signed states: you understand the outcome is undetermined and not guaranteed, especially on corrective procedures. Previous work by another artist is considered corrective work. The number of follow-ups on corrective work is determined by individual basis.

**Do not rub your eyes.** Your eyes may be numb and pigment and other debris can remain in your eyes for more than 24 hrs. and rubbing can cause corneal abrasions.

- **To lessen swelling**, place saran wrap over procedure area and apply cool compress after your appointment and the morning following, then apply as needed;
- With your doctor's approval, taking Benadryl and /or ANSAID may lessen swelling;
- **Apply thin coating of Vaseline or Aquaphor Ointment. Application Schedule: 3-5 X a day for 7 days.**
- Apply extra barrier of ointment prior to shower. Then remove and reapply;
- No direct shower spray on tattooed area;
- Do not soak the area in the bath or shower, swimming pool or hot tub, ocean water, pool water, lake water for 10 days;
- Do not exercise for 5 days, no sweating or raising pulse for 5 days;
- Absolutely no acids, cleansers or beauty creams on procedure area for 7 days;
- No skin lighteners
- Protect the area from UV light (sun and tanning beds) with hat, sunscreen, sunglasses, or put your hand or towel between your tattoo and UV light. Permanent makeup tattoos lose pigment faster than body art tattoos due to thinness of the skin covering the pigments and lack of UV protection. 1-minute a day in the sun for a year without UV protection equals 365 minutes, or 6 hrs., of tanning;
- No mascara for 72 hours with new tub;
- No contacts for 24 with new or disinfected contacts.

Thank you for your business! if you have any questions: call or text Veronica M. Morris, Owner & Artist, 832-544-1486. Fees are dependent on time from initial procedure and can be found at <http://www.riseandshinepermanentmakeup.com/service-menu.html>. All prices are subject to change.
