

**Manufacturers Represented**

 <p>Amitron is one of the largest and most experienced circuit board manufacturers in the U.S. with over 30 years in the industry. Amitron is a leader in the thermal management technology and is fully devoted to saving customers money, time, and peace of mind.</p>	 <p>ARM based system on modules optimized for commercial deployment, based on the Atmel Cortex A5 and ARM A9 as well as Altera Dual Core A9 and NXP I.MX6 with optional built in WiFi.</p>
 <p>A premier supplier of audio and voice IC and software solutions for mobile communications, automotive entertainment, and customer audio applications.</p>	 <p>Excell Battery Company is an ISO 9001:2008 certified custom battery pack manufacturer specializing in Lithium-Ion and Lithium Primary custom battery packs.</p>
 <p>Grayhill manufactures a broad line of electro-mechanical for human interface including optical encoders, rotary switches, keypads, joysticks and pushbuttons. Grayhill creates custom operator interface panels and product shells that integrate displays, touch technology, and wired or wireless technology.</p>	 <p>Manufacturers Products 500 MHz to 110 GHz Amplifiers, Frequency Multipliers, Frequency Converters VCOs, DROs Transceivers, Custom Integrated Assemblies.</p>
 <p>nVent Schroff is a premier supplier of electronic enclosures and accessories. nVent Schroff offers over 6,000 standard models or you can use our custom product configurators to create your own custom enclosures. nVent Schroff (formerly Calmark and Birtcher) offers a wide range of accessories including retainers, Card and Wedge Loks.</p>	 <p>Complex rigid flex and multilayered flexible circuits that are typically used in high reliability device packaging, such as medical, military and industrial electronics where there is a desire for condensed packaging, with light weight, and enhanced reliability and survivability.</p>
 <p>Teledyne e2v HiRel partners with NXP to bring the QorIQ, T series, and Layerscape processors into the military markets and in some cases Space applications. In addition, very highspeed data converters for military and space applications.</p> <ul style="list-style-type: none"> <li>• Pre-negotiated access to leading domestic and international RF semiconductor and device portfolios.</li> <li>• Wafer purchase, packaging, screening &amp; qualification to catalog space.</li> <li>• Sourcing die to full hermetic packaged products</li> <li>• Customer SCD requirements can be accommodated.</li> </ul>	 <ul style="list-style-type: none"> <li>• Access to a combined portfolio of over 600 MMIC and specialized RF devices for defense &amp; space applications.</li> <li>• Signal Chain - Analog, memory, logic, microcontrollers, microprocessors, data converters, prog. logic, power</li> <li>• RF ICs - PLLs, switches, mixers, DSAs, Pre-scalars, Gain Blocks, Limiters</li> </ul> <p>Power – Modules, GaN</p>
