

THE VIRGO-ORION CONNECTION I

The purpose of this illustration is to convey what the sky will look like begin in the month of September 2017 that will lead-up to the Great Virgo Sign of the book of Revelation 12. As a prelude to the astronomical alignment, the location on Earth will center on the Giza Plateau of the Great Pyramid. As with the sky in September, and as with Virgo, the Orion belt stars and Leo mirror the 3 Pyramids of Giza and the Sphinx in a similar fashion. What will be noticeably different and striking is that there will be some planetary alignments that suggest a message of sorts perhaps. The perspective is also capturing the essence of how Egypt, he Pyramids the Nile and the Holy Land mirror the constellation of Virgo, Leo, the Milky Way and the Orion belt stars. It has been well established for centuries that the 3 Pyramids of Giza align astronomically with Orion and the Nile River is as the Milky Way . The Sphinx is a rendition of Leo and Israel as the constellation Virgo.

First of all, on September 11, 2017, it will be 16 years since the Muslim attack on the USA's World Trade Center Towers. It is believed by many that the birth of Jesus was also on 9-11, -3 BC.

As the Great Virgo Sign is configuring in the September month of 2017, on 9-11, the planet Venus will reach a maximum directly in line with the Great Pyramid. Also the planet Mars will conjoin the Star of the King, Regulus, the 'Heart of the Lion'. At this time, Jupiter will have had been 'birthed' 2 days from September 9th as it crossed the threshold 'line' of the 'womb' of Virgo.

Porrima
a 'prophetic birth' to come

JUPITER
'Birthed' already
On Sept 9, 2017

The illustration of the Pyramids are not to scale as the constellations are skewed to include the breath of the East to West coordinates. The Ecliptic is not shown but the Galactic Equator is instead where it bisects Virgo and Orion. It appears that Orion is somehow and in some way connected to the Great Virgo Sign of September 23, 2017.

What is rather unique is that in tis skewed rendition of the entire directional coordinates, the Sun is in approximate phi ratio to the coordinates whereby the Moon is on the opposite side in the West and Virgo is in the East. The fulcrum of the phi ratio spiral, for emphases converges in the Virgo Star of Porrima. Porrima is the 'Goddess of childbirth', and in ancient times, the 'Goddess of Prophecy'. Thus are the stars are telling of a coming 'prophetic birth'? Furthermore the phi ratio of the Sun is in direct alignment to the Sphinx below and Leo above.

It is important to take note as Jupiter is not 'birthed' on September 23, 2017 as most suggest or are expecting. Now what the Mars and Venus conjunctions with Regulus means is yet to be determined. One can somewhat speculate that Mars, being the planet of War and Leo is the metaphor for Israel as related to the Lion of the Tribe of Judah, then one can suspect that a major confrontation in Israel between or amongst her Muslim enemies will ensue. Perhaps it is to occur soon, or soon after, the timeline is pure conjecture.

Typology	Object
ISRAEL	Virgo
Sphinx	Leo
Pyramids	Orion
Nile River	Milky Way-Eridanus

SEPTEMBER 11, 2017

- (9-11) @ 0 Hour with atmosphere stripped away looking south from Giza Plateau
- Vela rising over horizon
- Orion setting in the West
- Venus at maximum over Great Pyramid
- Mars in conjunction to Regulus the King Star
- Jupiter conjoins Spica (Seed of the Woman)
