

ROUZER SURGE PARTNER OF THE MONTH: HARGER

Harger offers solutions for lightning protection, grounding, and exothermic welding. Harger provides design services for engineers & contractors.

Contractor Promotion: Set up a demonstration with your Rouzer Account Manager, and at each demonstration (1) attendee will win a \$25 American Express Gift Card!

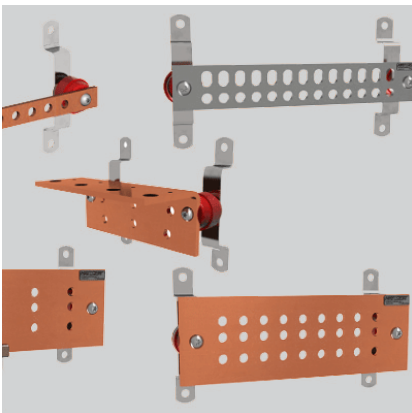

LIGHTNING PROTECTION

For over 55 years Harger has successfully designed, supervised and installed UL Master Label systems and is uniquely qualified to help others learn this process. Working in close partnership with Harger, Electrical Contractors can now self-perform lightning protection installation. Contact Rouzer for more information on Harger University.

EXOTHERMIC WELDING

Harger's Ultraweld UltraShot exothermic welding system provides superior grounding connections that last the lifetime of the grounding system. A major benefit of the UltraShot process is that the installation time is 40% to 50% faster than the traditional exothermic welding process! Call today to schedule a live demo!

GROUND BARS

Harger provides quality UL Listed grounding busbars to the electrical and telecommunication markets. All lengths and widths including the ability to custom-design according to specification. Unmatched turn-around time due to in-house production.
