

Fred's Kids Newsletter

April 2024

Fred's Kids has two main interests. One would be spreading the good news and second would be taking care of the needs of the children.

The task of spreading the Gospel is not easy in Kenya. Many times it is done by walking back roads in very bad conditions. But these disciples of Jesus do not let that stop them.

Making sure that the children have plenty to eat is one of the most expensive things we do. The prices in Kenya have doubled over the past couple of years but the task has not lessened.

The teachers at Marindi Kindergarten were trying to teach with maize cobs and rocks. We were able to get them some very good learning materials for all three classrooms.

A donor ask what she could do to give the kids something special, Fanta and mandazi are always a hit.

We thank you for your continued support. You are changing lives now and for eternity.
