

DR. STOCK EXPLAINS COVID DECEPTION MEASURES TO COMBAT COVID DO NOT WORK

Mount Vernon School Board Meeting Discourse

by Luis B. Vega

www.PostScripts.org

The purpose of this report is to provide a transcript of a very informative explanation of what is really behind the COVID-19 Agenda. It is told by a Dr. Stock before a panel of School Board Members meeting at the Mount Vernon School in Indiana, USA. The video was posted on August 11, 2021. Dr. Stock claims that the COVID-19 Injections are causing the current surge in COVID-19 cases.

The video clip of Dr. Stock addressing the Mount Vernon Community Schools Board, pushing back against the Mask Mandates and extolling the dangers of COVID-19 Injections went viral. Of course, YouTube wasted no time in taking it down for violating their 'Community Communist Guidelines'. In some instances, the video had garnished over 5 million views in several channels.

Then the Soros funded 'Fact Checkers' went hard at work to discredit the Doctors' claims even though he presented documentation that included CDC's own Scientific Papers. It captivated America's interest, and those of other countries that are skeptical and weary from a plandemic and fraudulent lies coming from the CDC, Fauci, the WHO and the Biden Government.

The censored central Indiana-based Doctor is a Hero. Yet, he as others who come to the same conclusion are attempting to expose the COVID Deception. It is the plan to cull Humanity and kill-off millions if not billions. All the references to his Citations are listed in the Endnotes.

The actual meeting lasted for over an hour. Presently, the copy of the video exchange can only be found in alternative video hosting platforms. For the transcription, numbers 1-10 will be numerated for emphasis. In parts that are not audible, there will be a skip. Also, certain number and or statement portions will be capitalized for emphases.

School Board Member

...'Looks like a Doctor's Signature to me. Well, that is why I cannot read it.

Dr. Stock

Guilty as charged. Dr. Dan Stock. 5777 West Seminar North, McCordsville, Indiana. To address your comment? Gee, it is hard to believe we are 18 months into this and still having a problem. And I would suggest the reason we still have a problem is because we are doing things that are not useful.

And we are getting our sources of information from the Indiana State Board of Health and the CDC, who actually do not bother to read Science before they do this. I am actually a functional Family Medicine Physician. That means, I am specially trained in immunology and Inflammation Regulation.

And everything being recommended by the CDC and the State Board of Health is actually contrary to all the Rules of Science. So, things you should know about Corona Virus and all other Respiratory Viruses. They are spread by Aerosol Particles, which are small enough to go through every Mask.

By the way, the Literature that supports all of that is in a Flash Drive that we have presented to you has been given to the Secretary. As a matter of fact, it quotes at least 3 Studies that sponsored by the NIH to that exact fact. Even though the CDC and the NIH have chosen to avoid, to ignore the very Science that they paid to have done. That is why you keep struggling with this is. It is because you cannot make these viruses go away.

The Natural History of all Respiratory Viruses, is that they circulate all year long, waiting for the Immune System to get sick through the Winter. Or become deranged as has happened recently with these vaccines. And then they cause Symptomatic Disease. Because they cannot be filtered out and they have Animal Reservoirs ...And this is very important point. No one can make this virus go away.

The CDC has managed to convince everybody that we can handle this like we did Smallpox, where we could make a virus go away. Smallpox had no Animal Reservoirs. The only thing it learned to infect was humans. That is why we were able to make that virus go away. That will not happen with this anymore than it will with Influenza, the Common Cold, Respiratory Syncytial Virus, Adenoviral Respiratory Syndromes or anything else that has Animal Reservoirs.

So, the reason you cannot do this, is because you are trying to do something which has already been tried and cannot be done. Equally important is that vaccination changes none of this, especially with this vaccine. And I would hope this Board would start asking itself before it considers taking the advice of the CDC, the NIH and the State Board of Health, why we are doing things about this that we did not do for the Common Cold, Influenza or Respiratory Syncytial Virus?

And then ask yourself, why is a vaccine that is supposedly so effective having a Breakout in the middle of the Summer when Respiratory Viral Syndromes do not do that? And to help you understand that you need to know, the condition that is called Antibody Mediated Viral Enhancement.

That is a condition done when vaccines work wrong, as they did in every Corona Virus Study done in Animals on Corona Viruses after the SARS Outbreak. And done in Respiratory Syncytial Virus, where a vaccine used in a vulnerable Individual done the wrong way.

Which why cannot be done right for a Respiratory Virus which has a very low Pathogenicity Rate, causes the Immune System to actually fight the virus wrong. And let the virus become worse than it would with Native Infection. And that is why you are seeing an Outbreak right now.

In fact, in that Flash Drive you are going to have coming to you, and in the emails with 6 extras, will be a Study showing that 75% of People who had COVID-19 Positive Symptom cases in Barnstable, Massachusetts Outbreak, were Fully Vaccinated.

Therefore, there is no reason for treating any person vaccinated any differently than any person unvaccinated. You should also know that no vaccine, even the ones I support and would give to myself and my Children ever stops Infection.

In 2014, there was outbreak of Mumps in the National Hockey League. The only People who came down the Symptoms were the People who were Unvaccinated or Unknown Vaccine Status. Boy, that sounds like a great argument for vaccines. But a question that you should ask yourself knowing that half of the People who came down with Symptomatic Disease, had no contact with an Unvaccinated or Unknown Vaccine Status individual. Where did they get the Disease?

And the answer was from the Vaccinated Individuals. No vaccine prevents you from getting Infection. You get Infected, you shed Pathogens. This is especially true of Viral Respiratory Pathogens. You just do not get Symptomatic from it. So, you cannot stop spread. You cannot make these numbers that you've planned on get better by doing any of the things you are doing.

Because that is the Nature of Viral Respiratory Pathogens and you cannot prevent it with a vaccine because they do not do the very thing you are wanting them to do. And you will be chasing this the remainder of your life until you recognize that the Center for Disease Control and the Indiana State Board of Health are giving you very bad Scientific Guidance.

And instead, read the Articles that are going to come on the email and are on this Flash Drive and listen to the People in this Audience here tonight, who actually have recognized the advice they are getting from the CDC and the NIH is counterfactual. And that is why you are still fighting this with this vaccine that supposedly was going to make all of this go away. But has suddenly managed to make an Outbreak of COVID-19 develop in the middle of the Summer when Vitamin D levels are at their highest.

By the way, the other thing that would be necessary any vaccine restriction to be considered is if there were no other Treatment available. And I can tell you having treated over 15 COVID-19 Patients, that between Active Loading with Vitamin D, Ivermectin and Zinc, that there is not a single person who has come anywhere near the Hospital.

And we already have Studies that show that if you achieve a 25 Hydroxy Vitamin D level greater than 55, your risk of COVID-19 Death will drop down to through one-quarter of the Population, average for the United States. And there are Active Treatment Trials included on that Flash Drive that is so the same is true. So, if you were going to discriminate based upon vaccine, you should also discriminate based upon 25 Hydroxy Vitamin D level, Zinc Taste Test Response and probably previous Infections.

Since there are also Studies on that Flash Drive that show that People who have recovered from COVID-19 Infection, actually get no benefit from vaccination at all. No reduction in Symptoms. No reduction in Hospitalization and suffer 2 to four 4 times the rate of Side Effects if they are subsequently vaccinated. Therefore, the Policies that you are basing on are totally counterfactual.

I do not blame this Board for that because I know you are not Scientists. And you thought it was reasonable to listen to the CDC, NIH and the Indiana State Board of Health. But I would encourage that instead, you listen to the People out here in this Audience and read what is on that Data Drive.

And if anybody here in this Board has any questions about anything on that, I will happily come back and sit with you individually, if you would like to explain the Science behind this. And if you are worried about being sued by somebody because you do not follow the guidance of the CDC, and the NIH, I will tell you have a free Pro Bono Expert Testimony at your disposal. I will testify in Defensive Discord, turning down all these recommendations for free, at any time, in any court.

Thank you.
