

Doors opening on the Silver Line

July 24, 2014 - 10:00 a.m.

Regional market highlights

2nd largest office market in the U.S. (behind New York)

7th **largest regional population in the U.S.** (5.9 million residents)

2nd **highest population growth from 2010-13** (behind North Dakota)

1st in educational attainment (nearly 60% possess a college degree)

Highest average household income (\$109,892 per year)

Low unemployment rate (5.0% vs. U.S. average of 6.1%)

3 major airports located within 30 miles

Excellent public transit system

Source: JLL, Census Bureau

Challenges and opportunities lie ahead

Sequestration and government austerity

Lame duck political environment

Drive to achieve greater space efficiency

Record concessions and flat rents

Corporate profits climbing to all-time highs

Budget deficit narrowing

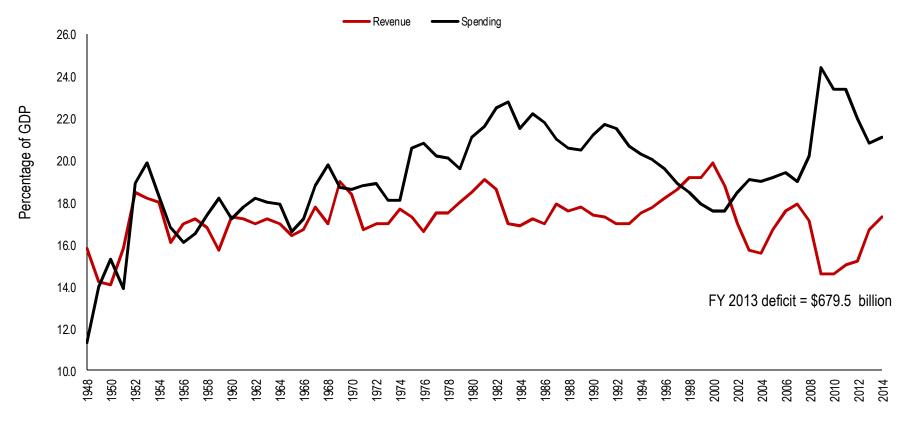

End of rightsizing wave approaching

Bottom is near in emotional places

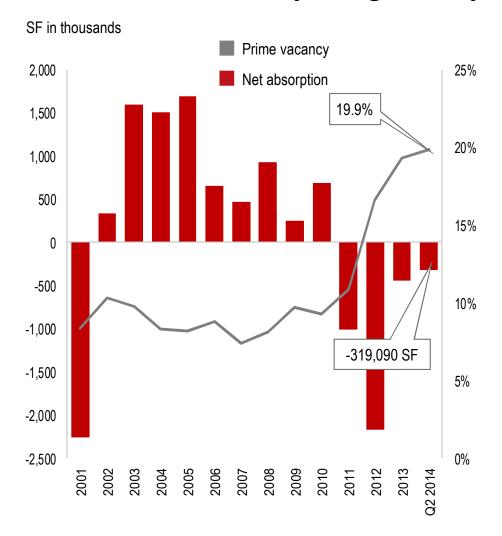

A look at today's federal budget environment; gap between revenue and spending reached an all-time high in 2009, but is trending in the right direction

Inside the Beltway Virginia dynamics

Market statistics

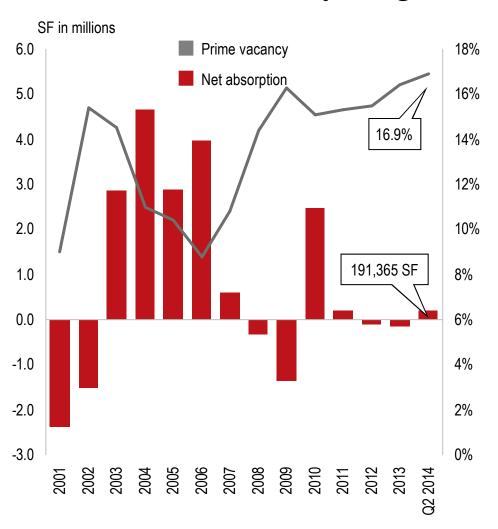

- 48.3 MSF market (286 buildings)
- 19.9% prime vacancy rate
- 20.1% total vacancy rate
- Class A: 18.1% prime; \$43.28 PSF
- Class B: 25.0% prime; \$36.05 PSF
- Construction: 1,048,626 SF (68.7% preleased)

Market trends

- BRAC relocations have caused 2.5 MSF of occupancy losses in Arlington County, severely impacting Crystal City & Rosslyn
- Government contractors are still seeing soft demand amid DoD budget cuts, yet some innovative sectors are offsetting that decline
- Asking rents dropped this year, driven by 15% cuts in Vornado's Crystal City portfolio

Outside the Beltway Virginia market dynamics

Market statistics

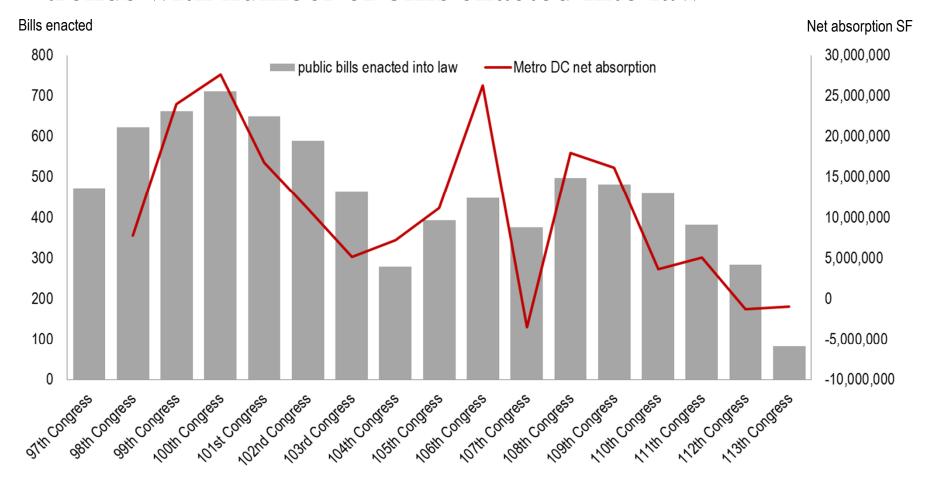

- 101.2 MSF market
- 16.9% prime vacancy rate
- 18.1% total vacancy rate
- Class A: 16.0% prime; \$34.16 PSF
- Class B: 19.5% prime; \$27.83 PSF
- Construction: 1,166,577 SF (42.9% preleased)

Market trends

- Reston Town Center continuing to vastly outperform the market, with move-ins by Bechtel and Leidos helping boost net absorption
- Future leasing demand likely to flatten outside the Beltway (aside from Reston Town Center and future Metro-served locations) due to changing workforce preferences that favor mixed-use, transit-oriented locations

Policy-driven market: Metro DC office net absorption trends with number of bills enacted into law

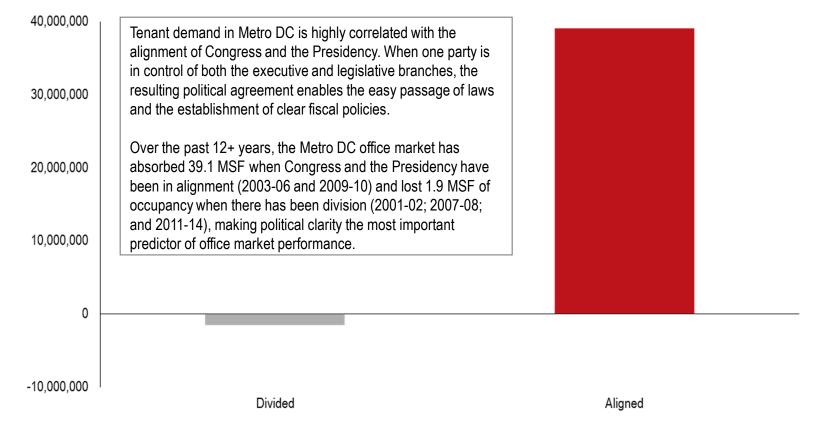

Source: JLL, U.S. Senate, data as of May 2014

Political alignment drives Metro DC office demand, while government gridlock stalls growth

Aggregate net absorption (SF)

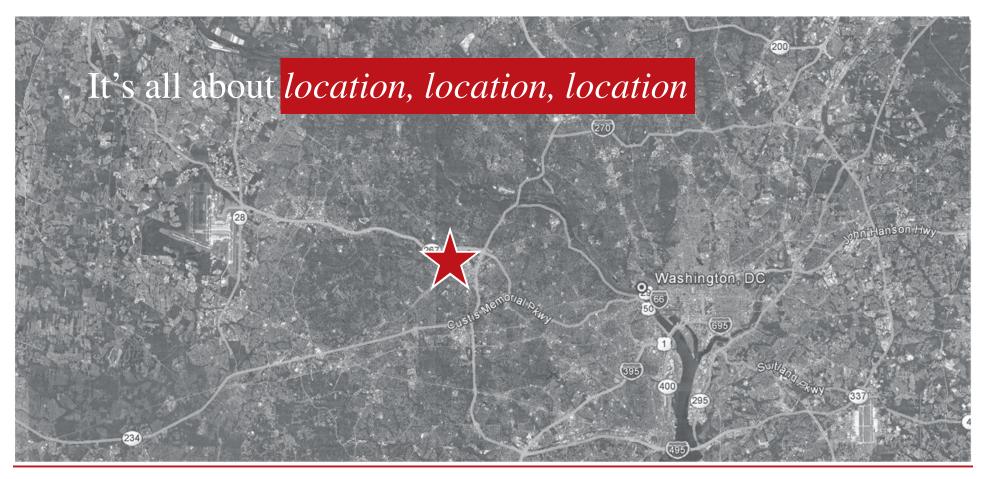

Source: JLL

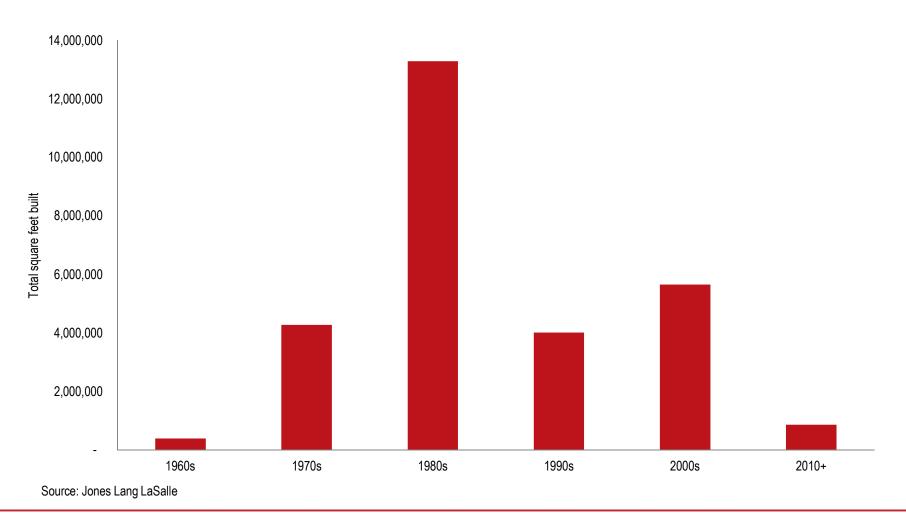

Tysons past success

- Driven by vehicular accessibility, pro-business governance and excellent public services
- Proximity to a retail hub Tysons Corner Center the largest shopping mall in the Mid-Atlantic

Office construction in Tysons peaked in the 1980s, when 13.3 million square feet delivered

Tysons' current challenges

- Traffic
- Walkability
- Relative lack of modern, efficient space
- Perception/cool factor

The four future "City Centers" of Tysons

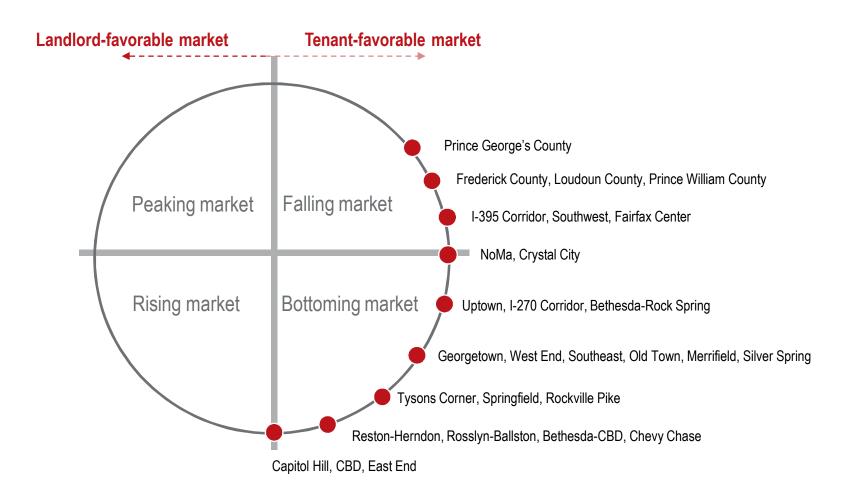

Regional demographics and retail expenditures

	Median household income	Median age	Annual retail expenditures	Have a college degree	Walk Score
Tysons	\$107,704	39.4	\$39,685	80.1%	66
Bethesda	\$102,717	39.5	\$40,889	83.1%	98
Chevy Chase	\$111,489	47.8	\$45,550	86.4%	78
Reston/Herndon	\$96,077	35.3	\$35,734	66.8%	36 (82 in Town Center)
R-B Corridor	\$103,570	31.7	\$35,803	85.5%	94
City Center	\$66,055	33.3	\$33,612	72.7%	94
Dupont	\$95,327	33.3	\$38,890	88.8%	98
U Street	\$81,699	32.8	\$33,947	70.1%	91
Capitol Hill	\$113,799	35.7	\$44,693	87.5%	91

Metro Washington, DC Office Clock Q2 2014

Landlord perspective

Tysons Historical Drivers

- CBD of Northern Virginia
- Centrally located in Fairfax County 13 miles from Dulles International Airport and 11 miles from DC

Transportation

- Companies can pull employees from Maryland, Virginia and Washington, DC.
- Access to major transportation arteries including the Beltway, Dulles Toll Road,
 I-66 and Route 7.
- Many employees benefit from reverse commute

Opportunities

 Low cost alternative to closer in submarkets including RB Corridor, Crystal City, Old Town and DC

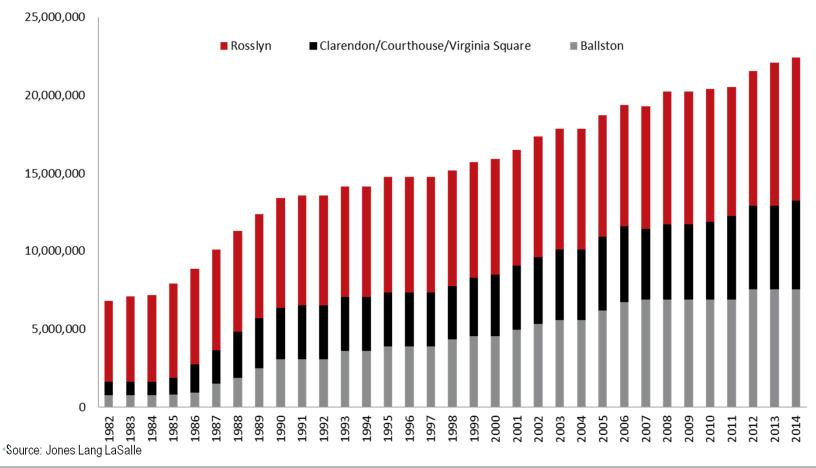

Who are the winners and losers when Metro opens on July 26?

- No immediate impact on pricing
- Need more office job growth and tenant demand
- Metro will give Tysons a bigger pool of tenants. Will be able to attract from DC, MD, Inside the Beltway. Opens up Tysons to federal agencies that need to be located within half a mile of a metro stop
- When the Silver Line opens only building located within 400 yards of the stations will be considered walkable while further away offices will use shuttles.
- Won't be walkable until more retail and residential projects deliver

It will take years to fully build out Tysons just as supply has tripled in the 35 years after metro opened five stops in the Rosslyn Ballston Corridor.

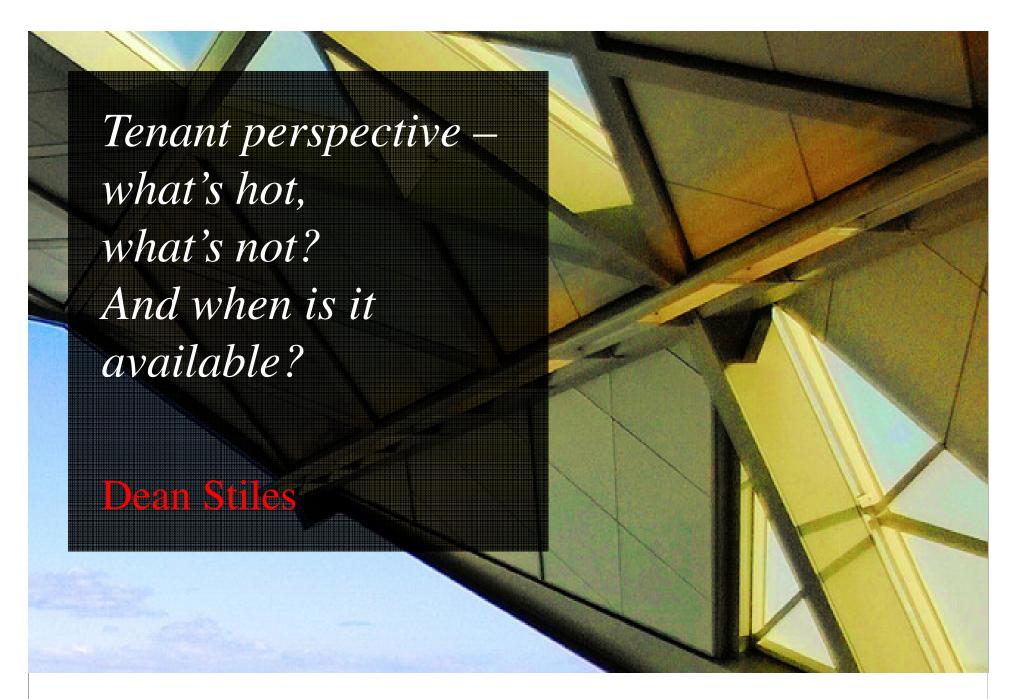

Positive takeaways for Metro

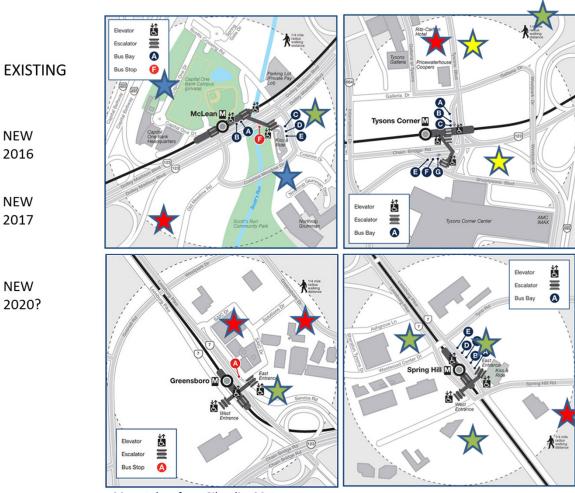

- Shovels in the ground on the first wave of development
- Macerich delivered office building, nearing completion on hotel and apartment buildings
- Lerner resumed construction on 1775 Tysons Boulevard
- Greystar's Ascent delivered in April and has leased over 100 units. They are going to begin construction on another 400-unit apartment
- Cityline Partners' Arbor Row under construction
- New product within ¼ mile of metro is leasing as seen by Tysons Tower delivering 61.4 percent preleased

20,000 sf of Office Availability within ¼ mile?

Tysons West JBG Rosenfeld Phase I includes a Walmart that opened in 2013. Will have 1.3 MSF at total build out

Perseus Realty and Sunburst Hospitality Corporation 7.6 acres which will include a mix of development.

Spring Hill Station Georgelas Group 31.62 acre site which will include 7.4 MSF of future development

Sampling of projects...

Dominion Square West
Capital Automotive
7.62 acre site which will have 2.2 MSF at
total build out including three office buildings
and three residential towers

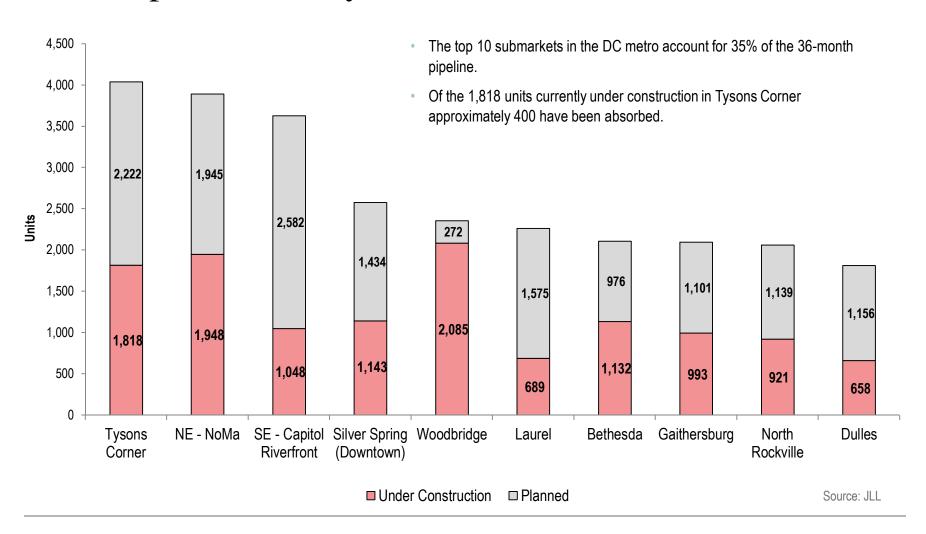

Dominion Square East
Capital Automotive
11.96 acre site which will include three office buildings, two residential towers and one hotel

Tysons Corner leads the metro area in multifamily development activity

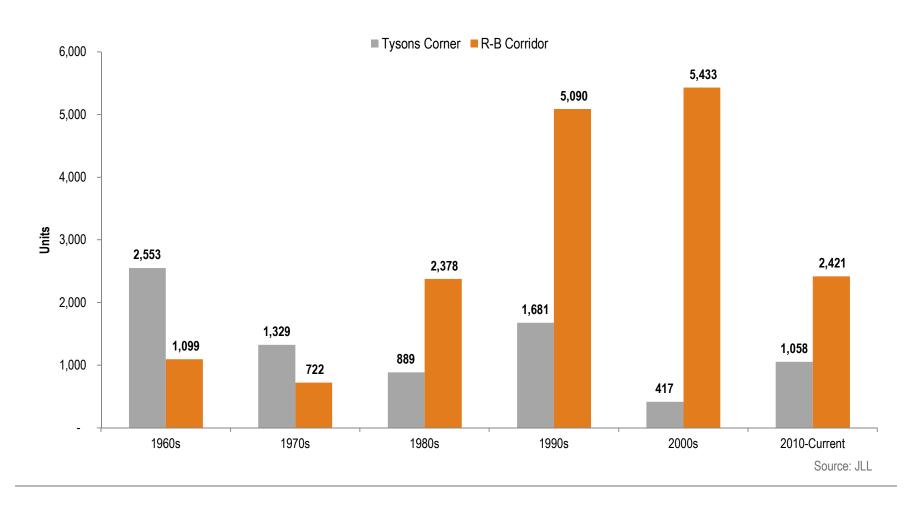

Multifamily development centered on Silver Line stations

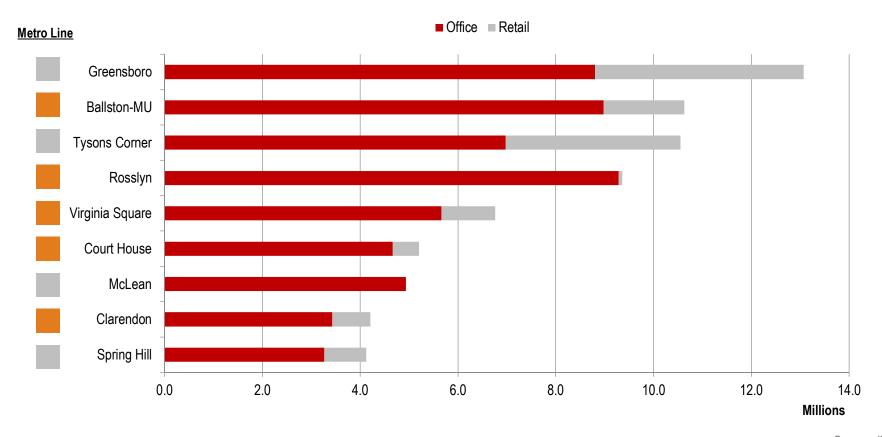

Despite an uptick in new construction, Tysons remains historically undersupplied, especially compared to other Metro served submarkets such as the R-B Corridor

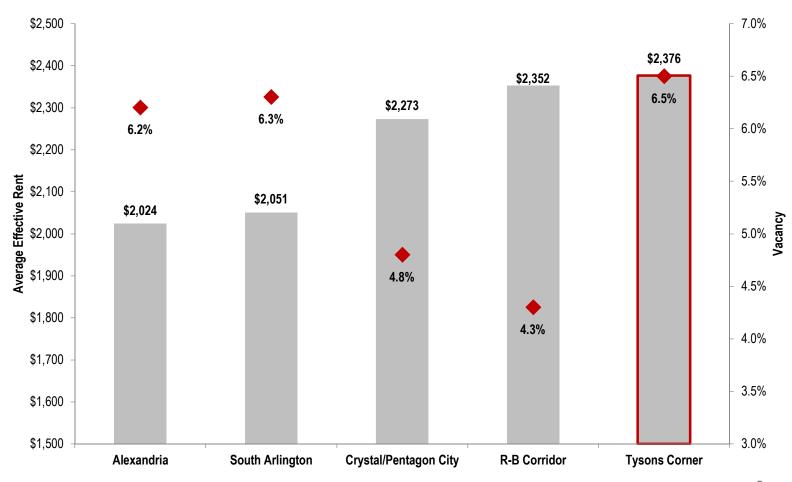

The abundance of retail and office space within a 0.5 mile radius of the new Silver Line Metro stations has set the stage for desirable walkable communities

Class A residential rents in Tysons in line with R-B Corridor but vacancy remains slightly elevated

Areas around Silver Line metro stations primed for multifamily development

Metro Station	Walk Score	Office SF	Retail SF	Existing Units	Units U/C	Units Proposed	Population
Tysons Corner	69	6,974,649	3,575,283	1,181	835	894	1,212
Wiehle-Reston East	52	4,059,790	14,346	0	450	380	1,285
McLean	54	4,935,292	0	624	440	2,600	3,029
Greensboro	62	8,801,079	4,270,761	571	0	520	1,711
Spring Hill	57	3,265,677	858,659	678	0	350	3,157
Clarendon	91	3,429,778	777,091	3,224	737	126	11,632

- All five Silver Line Metro stations rank among the top ten Metro stations when comparing the ratio of total office square footage to existing multifamily units
- The Greensboro, Tysons Corner and Spring Hill stations rank in the top ten when applying the same ratio to total retail square footage

Note: Statistics reflect the ½ mile radius surrounding each of the Silver Line Metro stations

Office Capital Markets: Silver Line/Tysons Perspective

What Metro opening means to Tysons and Wiehle station assets and how to capitalize on Phase II sites

Market Peak 2004 - 2008

Recession 2008 - 2011

Sequester 2012 – 2013

Silver Line 2014 -2017

- Core investing
- Strong sales volume averaging \$450 million/ year
- Tysons is viewed as core with future Metro delivery propelling interest
- Pricing reaches low \$300+ PSF for "core" assets
- Cap rates ranged from 5.25% – 7.0% for core/ core-plus, driven by projected rent growth/ attractive financing

- Value investing
- Sales volume of \$600 million total, \$450 million in 2010
- Tysons vacancy increase, causing investor reliance on future Metro
- Tysons experiences no sales transactions in 2009
- Cap rates ranged from 5.6% - 13.3%, 70+% of transactions in 2010 and 2011 were value-oriented

- · Value to core investing
- Modest sales volume of \$200 million/year, few signs of recovery seen
- Contractor downsizing/ lack of budget tempers investor interest
- Pricing still resilient, \$300 PSF for stabilized assets
- Cap rates ranged from 6.0% to 8.5%, trades involved core and coreplus with some abovemarket rents occurred

- Buy/Sell into Metro delivery?
- Will sales volume increase with Metro delivery and resulting rent growth?
- Private sector and GSA tenancy at rents below prospectus expected
- Should pricing of Silver Line assets be on par with Rosslyn-Ballston Corridor?
- Cap rates will vary widely given Metro-walkability and quality/asset differentiation

Thank you
