

This past summer Hometown Energy Co., Inc. purchased a long time Newark based business, Graham LP Gas & Fuel Oil Inc. The Graham office located at 110 East Pearl Street and the bulk plant located on Bloom Road will remain open to service the Graham customers and the Hometown customers that are in this area. We are pleased that Don Graham, Robin French and Dave Arbogast have agreed to continue on with Hometown.

Robin French & Don Graham

Hometown Energy officially started in business in 2002, but the owners and staff have all been involved in the energy business for many more years. Hometown was started because we saw a need in the western New York market for an energy company that knew how to provide the level of customer service that customers wanted and competitive prices.

Hometown currently has offices in Brockport, Rochester, Penn Yan and now Newark. All offices are staffed with seasoned energy customer service representatives that are trained to take care of your energy needs and questions.

Hometown feels it is very important to be a full service energy provider. This means we offer not only all of the petroleum and propane products but also a full-service, Service Department. We provide 24/7 service to our customers so that you have the security of knowing if something goes wrong with their heating equipment we are just one phone call away. It is a Hometown employee that monitors and handles ALL emergency calls; you do not have to talk to an answering service.

Hometown Energy is also committed to have adequate storage so that your fuel is close by in case of supply disruptions. We have fuel storage in Brockport, Leister, Penn Yan, Farmington and now Newark. We are currently updating the former Graham storage facility on Bloom Road.

New Bulk Plant storage facility in progress located on Bloom Road, Newark.

We are pleased to be in Newark, and we hope that if you need any of the services that we provide you give us a call. The Graham phone number is still available 315-331-8830. We encourage you to visit our website www.hometownenergy.com to learn more about our company and the services we provide.
