

Data Solutions

Virtual Private LAN Service

With Shaw Business VPLS services, companies with more than one location can merge their traffic onto one connection to lower costs, increase productivity and enhance network security.

- Get the simplicity of Ethernet with the added ability to manage traffic through Quality of Service (QoS)
- Bundled pricing delivers incredible value
- Delivered over a dedicated private network to provide maximum security

Wavelengths

Built for large companies, wholesalers, Internet and wireless providers, this service is ideal for high bandwidth, low latency and mission critical applications.

- Delivered over our next-generation DWDM network and offering a full range of bandwidth options with 1 G, 10 G, 100 G
- Provides secure, fully-dedicated non-switched transport of Ethernet traffic
- Combines the privacy of dedicated bandwidth with the simplicity and affordability of Ethernet

Ethernet Virtual Private Line

Designed for companies requiring "Point to Point" or "Hub and Spoke" connectivity, this service offers all the advantages of VPLS, but is optimized for connecting regional offices to a single head office.

Private Line

Enterprises, wholesalers, Internet and wireless providers in particular can benefit from our Private Line service, which is designed to deliver secure, point-to-point transmissions over our fiber-based network and meet the most robust communication requirements.

- Gives you ownership and management of your network
- Can be activated or "turned up" quickly and affordably
- TDM and SONET network backbone provides exceptional reliability
- Our network capacity is in excess of 2 TB per second

Advanced technology. Flexible solutions.

You can rely on Shaw Business for highly advanced technology, flexible packages, affordable prices and fast installation – all backed by 24/7/365 customer support.

Voice Solutions

Business Phone Basic

With a low monthly rate, this is a highly cost-effective solution for a secondary business line to operate a fax or POS machine.

Business Phone

Built for small businesses, this feature-rich plan gives you the flexibility and functionality you need to run your business, and features attractive monthly rates.

It includes:

- 18 features such as Voicemail, Voicemail to Email, Simultaneous Ring and Multiline Hunting
- Complimentary Shaw to Shaw Calling and great long distance rates

Business Phone Plus

The perfect phone plan for small businesses that rely on daily long distance calling. This package includes all the advantages of Business Phone, plus what you see below.

It includes:

- Unlimited long distance calling to the U.S. and Canada
- 1000 long distance minutes to over 50 countries worldwide

Managed PBX (Private Branch Exchange)

Built for small businesses that need multiple phone lines, this sophisticated phone system puts you in control. Fully managed by Shaw, this solution comes with the Cisco Unified Communications System providing you with advanced functionality.

It includes:

- Hardware and software fully managed by Shaw
- Simple "per seat" pricing – pay only for what you need
- The ability to keep your existing numbers
- A robust set of over 20 advanced features
- Supports up to 23 phone lines

Hosted PBX (Private Branch Exchange)

Built for businesses that need a sophisticated system to support multiple phone lines. Hosted PBX is a highly scalable solution giving you the flexibility to easily and quickly add or remove phone lines without the need of on-site equipment.

It includes:

- A clean, simple infrastructure
- Advanced features like Direct Inward Dialing, Shared Line Appearance and Auto Attendant
- Top-to-bottom hardware and software management
- Supports up to 600 phone lines

PRI (Primary Rate Interface)

Designed for medium to large enterprises, PRI is a highly robust phone solution that allows organizations to consolidate their voice lines in order to cut costs.

It includes:

- An Automatic Failover Feature to ensure you never miss a call, even if the switch fails
- A seamless transition from your current provider
- A robust set of calling features
- 10 Direct Inward Dial phone numbers
- Advanced scalability, with the ability to transition to next-generation SIP technology when ready
- Up to 23 channels per PRI
- A partial PRI package with eight channels is also available

SIP (SIP Trunking)

An enhanced communication platform built for medium to large businesses. Leveraging next-generation technology, SIP offers cost-effective IP data connectivity to run your local, long distance and private voice traffic.

It includes:

- One access for voice and data, resulting in cost efficiency
- Superior call quality and real-time communications applications delivered over a dedicated network
- The option to create virtual inbound numbers
- The reassurance that comes with the Shaw Service Level Agreement

Internet Solutions

Business Internet 5

Our simplest Internet solution is built for basic occasional usage needs. Adequate for email and minimal web surfing.

It includes:

- Up to 5 Mbps download speed and 0.5 Mbps upload speed
- 125 GB per month included data
- Five email addresses (yourname@shaw.ca)

Business Internet 15

This starter package will cover basic Internet needs, including emails and light web surfing for a small number of users.

It includes:

- Up to 15 Mbps download speed and 1 Mbps upload speed
- 125 GB per month included data
- Five email addresses (yourname@shaw.ca)

Business Internet 25

This plan includes a fast, reliable connection that's ideal for small business use, from emails and web surfing to cloud-based applications.

It includes:

- Up to 25 Mbps download speed and 2.5 Mbps upload speed
- 250 GB per month included data
- One static IP address
- Ten email addresses (yourname@shaw.ca)
- The option to add Shaw Business WiFi

Business Internet 50

Built for small and medium businesses, this plan offers ultra-fast connectivity for heavy everyday Internet use – at an affordable price. Great for hosted email, multimedia, VPN, remote access and online meetings.

It includes:

- Up to 50 Mbps download speed and 5 Mbps upload speed
- 500 GB per month included data
- One static IP address
- Ten email addresses (yourname@shaw.ca)
- The option to add Shaw Business WiFi

Business Internet 100+

Providing high performance Internet for medium and large businesses, this plan offers incredible speeds for heavy and constant use.

It includes:

- Up to 100 Mbps download speed and 5 Mbps upload speed
- 1 TB per month included data
- One static IP address
- Connection for a fax line or POS
- Ten email addresses (yourname@shaw.ca)
- The option to add Shaw Business WiFi

Business Internet 250+

Including all the advantages of Internet 100+, this plan gives you even more bandwidth for the ultimate Internet experience with blistering speeds. It enables your organization to stream data, send and receive large files in a snap and connect multiple devices.

It includes:

- Up to 250 Mbps download speed and 15 Mbps upload speed
- 1 TB per month included data
- One static IP address
- Connection for a fax line or POS
- Ten email addresses (yourname@shaw.ca)
- The option to add Shaw Business WiFi

Commercial Gateway (Bundled Service)

Providing a symmetrical data connection with equal upload and download speeds, the Shaw Commercial Gateway gives you plenty of bandwidth with no data limits.

It includes:

- The ability to easily scale up in 1.5 Mbps increments as your Internet needs grow
- The option to use all the bandwidth that you can handle without incurring additional usage costs
- Delivery over copper, a great alternative for those without fiber or coax network coverage
- Access and usage bundled in one convenient package

Fiber Gateway (Bundled Service)

Also built for medium and large enterprises, the Shaw Fiber Gateway is a cost-effective bundle that connects your business to our industry-leading Internet backbone while providing the reassurance of Service Level Agreements.

It includes:

- A robust fiber-fed network to provide symmetrical upload and download speeds
- 10 Mbps, 100 Mbps and GigE bandwidth options for maximum flexibility
- Our Internet backbone peering connections means traffic arrives at its destination faster
- Access and usage bundled in one convenient package
- Flat rate, burstable, and metered billing options to suit a variety of business needs

Network Gateway

Built for medium and large enterprises, the Shaw Network Gateway provides a symmetrical connection with a Service Level Agreement. Its ultra-fast connection helps you avoid congestion.

It includes:

- Scalable bandwidth, from 1.5 Mbps, 10 Mbps, 100 Mbps, 1,000 Mbps, and beyond
- Over 1000 peering connections to ensure traffic arrives at its Internet destination faster

Point-of-Sale (POS) Connect

Offering a reliable connection for credit and debit card payments, POS gives you the confidence of smooth transactions at an affordable price.

It includes:

- Up to 256 Kbps download speed
- Up to 128 Kbps upload speed
- 10 GB per month included data
