

La Luz Early Childhood Center

Enrich the day, brighten the future.™

La Luz Early Childhood Center Travel Policy

UPDATED AS OF 2-23-2022

For **DOMESTIC** travel, we will require you, staff and children (does **not include** household members-only those individuals coming in and staying in La Luz ECC), **REGARDLESS** of vaccination status, to test the day you return from your trip and then again, 2 days following your return. A rapid, at home test is sufficient. With each negative test, absent of **ANY** symptoms, you may return to work/school. For example, if you return Sunday night from a trip, test Sunday night and again on Tuesday night; can return to school on Monday with that first negative test result. Keep reading for more exclusions.

For **INTERNATIONAL** travel, we will require you, staff and children (does not include household members-only those individuals coming in and staying in La Luz ECC), **REGARDLESS** of vaccination status, to quarantine for 2 days, and then take two tests as above (for domestic travel). For example, you return from Europe on a Saturday night, you must quarantine for 2 days then test (can be rapid absent of ANY symptoms) on Monday night. With a negative test, you may return on Tuesday. **YOU DO NEED TO TEST AGAIN** on Wednesday night and can keep coming to school so long as it is negative, and you are absent of ANY symptoms. Again, **THIS ONLY APPLIES TO THE PERSON ACTUALLY STAYING AT LA LUZ FOR THE DAY**, i.e. staff member or enrolled child. Keep reading for more exclusions.

Should you have **ANY** symptoms during your trip or upon your return or if they develop at any time in the 10 days following your return, we will require a PCR test (unless the rapid test shows a positive), even with a negative, rapid test. If you choose not to submit a PCR test, you must treat it as a positive test and remain out for 10 days or can return after 5, so long as down to 1 or no symptoms, for 48 hours, **WITH** a KN95 mask on for another 5 days. Should the 1 symptom, after the 5-day exclusion, be either a fever, vomiting or diarrhea, then you can return 48 hours, in addition to the 5 day exclusion, after that 1 symptom has subsided without the aid of medication.

This effectively does away with any exclusions for **domestic** travel only, with a 2-test regimen (taken 48 hours apart with the 1st test taken the day the person who stays at La Luz for the day, who traveled-excludes household members who travel-returns) and a modified 2-day quarantine for international travel.
