****Our chemical policy is as follows****

Gransasso Inc. will supply all the chemicals for your pool needs. We will not apply any chemicals the customer buys independently. There are thousands of manufactures of chemicals that make products of differing chemical compounds, concentrations, and that have multiple fillers and add-ins. Some chemicals can severely stain your pool, cloud your water, and destroy surfaces and equipment. Some chemicals when applied together can cause grenade like explosions or release poisonous gases. Others are so watered down that they will barely accomplish anything. For the above reasons we have to strictly adhere to this policy.
