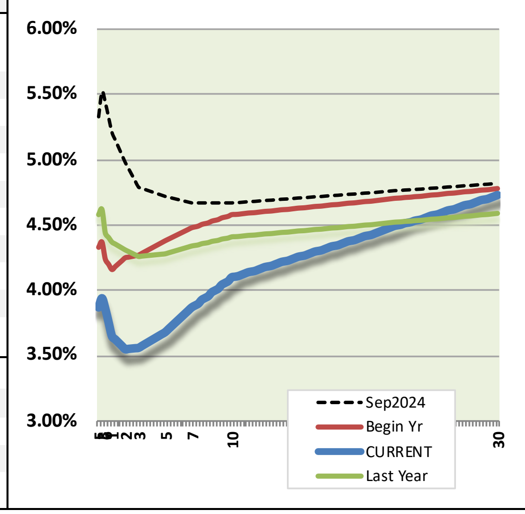
YIELD CURVE ASSESSMENT



ECONOMIC UPDATE AND ANALYSIS

US POSTS SOLID JOB GROWTH IN SEPT

LABOR FORCE INCREASES FASTER THAN POPULATION

U.S. employment growth accelerated in September, but wqqs slihtly less than than the number of people entering or reentering the labor market.

The jobless rate rose to 4.4%, its highest level in four years, from 4.3% in August. The August data was revised to show employers shedding jobs for the second time this year, underscoring the labor market softness.

The rise in the jobless rate may bolster the argument for another Federal Reserve benchmark rate cut next month, while some conclude that the better-than-expected job growth suggested policy-makers should stay pat, especially since the next employment report won't come until the December 9-10 meeting.

Nonfarm payrolls increased by 119,000 jobs after a downward revised drop of 4,000 in August. But there's no question that the labor market has lost upward momentum this year, as evidenced by sharp downward revisions to nonfarm payroll counts.

We suggest that the slowdown is based on he reduced supply and demand for workers and companies improved scope and efficiency of services.

STRATEGICALLY SPEAKING

We estimate the economy needs to create less than 80,000 jobs per month to keep up with growth in the working-age population, though the rise in the unemployment rate in August and September suggests the break-even rate could be slightly higher.

The unemployment rate has trended higher, but for the 'right' reasons because labor force participation is rising even faster than the solid gains in employment.

The household survey from which the unemployment rate is derived showed 470,000 people entered the labor force in September, but household employment only increased by 251,000. It also shows there has been a steady rise in the number of people who have permanently lost their jobs, which persisted in September, and fewer people reported working part-time for economic reasons, but many were holding more than one job.

The labor force participation rate was 62.4% in September, having changed little over the month and the past year. The employment-population ratio was also little changed in September at 59.7% – though it's down 0.4 percentage points over the last year.

The number of long-term unemployed, defined as being jobless for 27 weeks or more, changed little at 1.8 million in September. The long-term unemployed accounted for 23.6% of all unemployed people for the month.

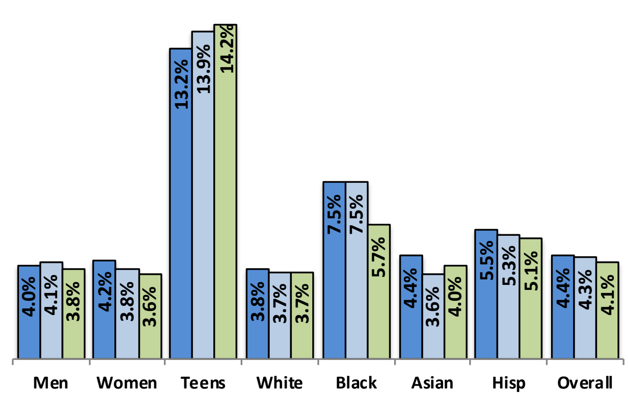
UNEMPLOYMENT BY DEMOGRAPHIC

CURRENT, LAST MONTH and ONE YEAR AGO



Brian Turner | President & Chief Economist | bturner@Meridian-ally.com | 972.740.9531 | www.Meridian-ally.com

THE ECONOMY AND STRATEGIC ASSESSMENT

CURRENT PROFILE

Growth Outlook
Slower pace nationally with pockets of stronger demand and spending

Inflation
More members living paycheck-to-paycheck. This dilutes purchasing power and discretionary spending

Household Wealth
Boosted by improvement in capital market, home values and stable wage growth

IMPACT ON OUTLOOK

Growth
Local demand should be sufficient to satisfy pending loan and deposit growth

Inflation and Household Wealth
Expect pace of inflation to range between 2.3% to 2.9% .. Pace of home prices should slow ... Expect pockets of course correction in credit markets

Credit Risk and Liquidity
Two biggest concerns mounting delinquency & cash flow mismatch. Delinquency doubling for 3rd straight month.

IMPACT ON DEMAND

Growth and Liquidity
Volatility in core deposits remains thus creating unable share growth and potential mismatch between loan/share growth capacity

Credit Demand
Slight fluctuation between A- and C-quality loan applications. Pressure to compromise U/W should be avoided

Share Growth
Volatile core deposits and organic growth will determine permissible loan growth

ENTERPRISE RISK EXPOSURE AND STRATEGIC ASSESSMENT

ASSET & NET WORTH

Growth & Capitalization
Efforts should focus on net worth with growth tied to retaining a well-capitalized net worth (>7%)

Balance Sheet Allocation
Must have limited complexity but capable to adjust due to economic, risk pressure and reallocation

Liquidity
Monitor mismatch between loan and share growth .. Core deposit volatility continues in market ... Loan growth is dependent on share growth

RISK EXPOSURES

Enterprise Risk
To garner best balance between financial and member service, the focus must take into account all risk exposures

Interest Rate Risk
Retain risk-to-ST earnings no greater than -10% to -12% given +/-100bp shift and risk-to-LT earnings no greater than -30% given +/-300bp shift

Liquidity Risk
Retail surplus-to-assets no less than 9%; ST Funding no less than 12%

CREDIT MITIGATION

Credit Risk Exposure
High priority in 2025 ... 87% of new origination must be B+-quality or better ...

Allocation and Average Life
Prime quality must be no less than 92% of portfolio .. Average life must range between 2.7 and 3.1 years

Recommend risk classifications of A+ (730+), A (680-729), B (640-679), C (620-639)

Loss exposure of Sub-prime may not dilute net worth below 7%

INTEREST RATES, PRICING SPREADS AND STRATEGIC ASSESSMENT

MARKET RATES

Benchmarks
Downward pressure on most treasury benchmarks with greater volatility on the long-end of the curve

Market Rates
Consumer rates will not experience as great a downward pressure as benchmarks... potential to 25 to 30 bp decline in vehicle loan rates

Greater volatility in mortgage rates with range between 6% to 7%

No change in core deposit rates but lower term CD rates

PRICING SPREADS

Effect on Pricing Spreads
Any downward shift in asset rates will be slower than benchmarks therefore relative value of credit-risk asset should increase.

No exposure in core deposit rates will see increase in relative value of core shares ... Improved liquidity profile and downward pressure on term rates should narrow funding spreads and potentially minimize the impact and need of promotional term CDs.

Largest impact from downward pressure comes from overnight cash

ALLOCATION & RETURN

Risk Allocation Metrics

Surplus-to-Assets:	>9%
ST Funds-to-Assets:	>12%
Vehicle-to-Loans:	>60%<75%
RE Loans-to-Loans:	>25%<50%
RE Loans-to-Net Worth:	<275%
Core-to-Shares:	>75%
Term-to-Shares:	<20%
"Misery" Index:	<0.80%

Outlook on Return
Marginal loan rates still higher than portfolio yields so even fewer originations might increase revenue
