

## **Peer Consultation Instructions**

### **2013 Interprofessional Faculty Development Institute for Quality Improvement and Patient Safety**

The goal of peer consultation is to provide feedback to the partner team

- What seems to be working well
- What are the opportunities for improvement

Peer consultation will occur between two partner teams. Divide time equally between both teams.

Team leader and recorder from each team will provide synopsis of their work to their partner team.

Supportive discussion will assist each team to improve their project.

Save 10 minutes at the end of the session to incorporate feedback gained from peer consultation.
