

# Major News Release

[Click on the above image to see a short video on how to use the configurator.](#)

Pop-Link Mounting System, by ADandD, has launched a one-of-a-kind 3D Product Configurator on our website, giving customers the power to configure and download 3D CAD models in seconds. The configurator is compatible with over 60 products offered in The Bracket Series, The HDPL Series, and The PL Series.

Instead of downloading each individual product piece, by piece, then spend your time building the model, you can now download the entire mounting system in over 150 native CAD formats and versions. There is also the option of downloading a PDF Datasheet, which is located under the CAD Download tab.

In addition to carrying products, distributors can take advantage of the configurator and use it as a strong sales tool. We suggest distributors do a personalized mail/news release to your customer base for quick payback for your effort. **Statistics show that 77-85% of views on the configurator will result in a sale.** Anyone can download the app “PARTsolutions” by CADENAS GmbH on their smart phones and tablets.

Check out the CADENAS PARTsolutions story on 3D Product Configurator:
