

"Dr. Emoto's "Message from Water" books and his recent exposure in the movie, "What the Bleep Do We Know," have changed our understanding of consciousness **and** our connection with water.

"His mission - to raise the level of awareness concerning water, and to heal the earth's water **includes a recognition of the fact that we are mostly water. Re-establishing the perfect geometry in our "water bodies" is one step towards that goal.**"

We believe fully in the efficacy of Dr. Emoto's work. It has been scientifically proven, that we as humans are over **80% water** ourselves. **If choice of verbiage can have such an amazing effect on droplets of water, what implication does that have for our bodies?**

Based upon Dr. Emoto's work, as well as recognized Chakra information, we have created the **"Reminder Band with a Mission!** With our bands, you will have triple the creative force, with you all day, every day. In combining the scientifically proven efficacy of select "verbiage" on water, the equally powerful efficacy of Color Therapy, and the energetic work of Chakra Therapy, you will experience the potent vibrancy inherent within yourself, like never before.

"Dr. Masaru Emoto was the first water researcher to discover a method for visually revealing the structure of water. Through high-speed photography, he has been able to capture the structure of water at the moment of freezing."
