## Anthem 360° Health

In 2008, employees will be surrounded with the help they need to live healthier lives. We are pleased to share that Anthem 360 Health is now a core program included as part of your employee benefit plan.

Anthem 360 Health is a dynamic, integrated collection of services that add value to your health benefits. It's a simple idea: when employees get healthy and stay healthy, health care costs can go down. 360 Health surrounds members with tools, resources and guidance to help them reach their own personal healthy best. It has a history of lowering costs while helping to improve employee well-being and satisfaction.

### Highlights include:

**24/7 NurseLine** - When employees need answers right away, they have direct, round-the-clock access to a registered nurse with an average of 19 years of nursing experience. It's toll-free and always confidential.

**ConditionCare** - Employees are not alone when facing asthma, diabetes, chronic obstructive pulmonary disease, coronary artery disease or heart failure. They'll have their own registered nurse to help self-manage their condition and improve their quality of life.

**ComplexCare** - This team of nurses specializes in helping people with complex care needs who might be at risk for even bigger problems in the future. With one-on-one attention

and coaching, a nurse will help develop a personal care plan to help reduce that risk.

**MyHealth@Anthem** - Finding reliable health info online can be like using a dictionary that's not alphabetized. This personalized site makes it easy for employees to find the info that matters and stay motivated.

The result? Healthier, more engaged, more productive, more satisfied employees. For all employees, that can mean everything.

Anthem 360 Health is an automatic enhancement to your employee benefit plan. Information about 360 Health can be found on the Anthem website when you sign in to your personal account.

## Get to know . . . Terry Dickey

- How long have you worked here? *12 years*
- What do you enjoy most about your job? *The people I work with*
- Where were you born? *Paoli, Indiana*
- Do you have any children? *3*
- Favorite restaurant? *Outback*
- Favorite TV Show? *Westerns*
- If I didn't work here, I'd be: *doing the same thing somewhere else.*
- A person in history you'd most like to have dinner with: *Elvis*
- What are you most proud of? *My kids and grandkids*

### EMPLOYMENT ANNIVERSARIES

Terry Dickey - 12 Years

Kevin Allstott - 2 Years

## Don't Give Fire a Chance

There's plenty of air, plenty of fuel, and plenty of ignition sources around construction sites - so we've all got to be on our toes to prevent fire. Here are some ways to keep the job from going up in smoke:

- Help keep the site clean. Store combustible materials away from ignition sources.
- Report any possible fire hazards that you notice: open flames, sparks, and electrical equipment that appears to need repairs.
- On hot-work jobs, be sure combustibles are safe from ignition. Have a fire extinguisher handy for welding and cutting operation, or when open flame equipment is used.
- Help protect temporary electric wiring from possible damage. In case of a fire in or near live electrical equipment, use a dry chemical extinguisher, and not water.
- Don't smoke near flammables, in "No Smoking" areas, or while re-fueling equipment. Make sure cigarettes and matches are out.
- Always use approved safety cans or the original manufac-

turer's container to store flammable liquids. Keep these containers closed when not in use, and never store them near exits or passageways.

- Clean up any spills as soon as they occur. Put saturated rags into closed metal containers.
- Watch to see that canvas tarps, plastic sheeting or other ignitable material don't get close to space heaters. Take care to see that heaters aren't accidentally tipped over.
- Know where the closet fire protection equipment is located, and how to use it. Check to see that fire-fighting equipment is in the clear, in proper condition, and ready for instant use.

We do everything we can to try to keep our jobs fire-safe - but it takes your help, all of the time.

## Thank You

We don't know where to start to express all the gratitude we have for everyone who has helped us. The outpouring of support and prayers has been overwhelming. We knew we were blessed by great family, friends and co-workers, but you don't understand how much everyone cares until you go through such a tragedy as losing everything in a house fire. We wanted to thank everyone for all that you have done; it truly means so much to us. Thank you to those who have given us furniture, clothes, money, shoes, jewelry, toys, dishes, etc. We would like to thank you all individually but SO many of you and your friends have helped that we would inevitably leave someone out who has helped us in a great way. Please forward this on to anyone you know outside of the company who has helped us, to let them know how much we appreciate everything they have done. A Big thanks to the French Lick Resort-Casino for the hospitality you have showed us by allowing us to stay and use the amenities during this hard time. It has allowed us to get our essentials together and to get into a more permanent place. I wish there was more we could say than just "thank you" as it seems so simple when you all have done SO much for us.

Thank you all so very much.

Amanda and Frank McCormick

## BIRTHDAYS

11 - Jeff Studnicki

*A man can be as great as he wants to be. If you believe in yourself and have the courage, the determination, the dedication, the competitive drive and if you are willing to sacrifice the little things in life and pay the price for the things that are worthwhile, it can be done.*

~ Vince Lombardi

# Project Updates

## Lindsey's Construction

We are down to concrete, asphalt, address sign, final grade, landscaping, fencing, and final material and equipment positions. I can see light at the end of the tunnel! Yeah!!

## French Lick Resort Casino

Everyone pitched in and helped with flooding issues, and are now back to ongoing projects which include wall and door divider areas, ceiling repairs, moving offices, etc. The guys said they have moved office cubicles to one area and a couple of weeks later moved them back to the original location. Dig a hole, then fill it up. Oh well, I think they have a new plan now.

## Legend of French Lick

Due to the flood we weren't able to get there a couple of days but still a lot of progress has been made the last couple of weeks. It's starting to come together and I think it is looking very good. I promised the owner we would be done no later than May 1st.

## Cave Quarries

Jeff has completed our portion of the work. The owner has elected to buy the overhead door through us and that will finish us up. The Quarry will complete the job with their own forces. Jeff helped see to it that the building was erected properly and worked during some nasty weather to get it done. Good Job!!

## French Lick Town Green

Things are about to pick up. We are going to start footings as soon as we get approved anchor bolt drawings and the block layer is scheduled to start on Thursday, March 27th. Some good weather would also be a great help.

## French Lick American Legion

I would like to get started right away.

## West Baden Town - Door

I would like to start right away.

## Justin Winger Home

We will get started late April or early May.

## The Grapevine

- Casino Addition & Renovations
  - High End Time Shares
- Hotel near West Baden Kimball's
- Hotel near the Brosmer/Kempe Funeral Home
- Hotel near the Springs Stadium Theatre

## UPCOMING BIDS

April 17 - Renovation of Orange County Courthouse

## BID RESULTS

### **Denny's Restaurant - French Lick, Indiana**

General Contractor - Lindsey's Construction

HVAC & Plumbing - Heat Pump Design, Inc.

Electrical - Weyer Electric

Sprinkler - Advantage Fire & Safety

## Negotiations - Still Pending

- Golf Maintenance at Pete Dye Course
  - Legends Restaurant
  - Restrooms - JSI Paoli
- Cooler/Freezer - Orange County Jail
  - Lady Hawks Locker Room
