## Who We Are

### About Us

Our mission is to provide high quality, accurate, and reliable consulting services to our diverse clients and build a world-renowned reputation of integrity within the weather consulting world.

Mr. Morris is a retired NWS meteorologist with 34.5 years of government service and an AMS certified consulting meteorologist (CCM) who established Global Weather and Climate Consulting LLC in 2013.

## Forecasting

### Model Data to Sensible Weather

We take computer model data from as many as half a dozen models and produce detailed and up-to-date sensible forecasts to meet the needs of the client – be it on land, on the water, or even in the air – across the globe.

### Impact-Based Decision Support

We provide relevant information and interpretative services to enable clients to make decisions when weather, water, or climate has a direct impact on operations, exercises, homeland security, counter-terrorism - the mission.

## Forensics/Expert Witness

### Application of Science to Law

We provide weather and climate reconstruction, analyses, reporting, and data acquisition for attorneys and investigators.

---

*“The Best, Toughest, Subject Matter Expert I Have Ever Questioned in a Deposition”*

*Atty. Yeznik Kazandjian – Feb 2015*

---

### Subject Matter Expert (SME)

We provide weather and climate SME testimony at trials and depositions for both plaintiff and defendant. Cases include personal injury, insurance claim, insurance fraud, and breach of contract.

### Weather Reports and Summaries

We prepare weather and climate reports and summaries for company brochures, employee training and orientation, and internal or external accident reports.

*Observations being taken outside The Voice studios in Hollywood, CA*

## TV/Commercial Production Support

### Observations for Insured Events

We provide location specific weather observations of all sensible weather elements by a qualified weather observer – AMS and NWA member, retired NWS, and NWS certified. Complete with self-contained and calibrated mobile equipment for all types of weather – from the beaches to the mountains.
