

Scott Reynolds
Environmental Consulting and Canine Training/Handling Credentials

Summary

Scott has over 20 years of experience as a canine trainer and working dog handler. He has trained, handled and certified canines for missing persons location, narcotics detection, and evidence location. Scott is the co-owner and Vice President of Environmental Canine Services LLC (ECS), has trained his own ECS canines and worked with them all over the country. He also currently works full-time for the Cumberland County Soil and Water Conservation District in Maine as a Watershed Specialist, where he is part of a team that provides audit and compliance support for MS4 regulated municipalities and conducts annual property inspections as part of the Nation's only watershed regulated under the Residual Designation Authority.

Education

B.S., Environmental Studies and Applications, Michigan State University, 2006

Previous Canine Scent Training Experience

Illicit Discharge Elimination Program (IDEP), Michigan, Tetra Tech 2007-2009 – Trained and handled canine Sable, the first sewage detection canine in the world to detect and source track illicit discharges.

Central Oklahoma Search and Rescue (COSAR) 2000-2002 - Head Trainer for volunteer canine search and rescue team. Coordinated the development and implementation of training standards for search canine and handlers for certification.
