

Water Distribution Foreman, Johnson Utilities / San Tan Valley

Johnson Utilities transferred its management and operations to EPCOR USA on August 31, 2018. EPCOR is committed to being a good neighbor, a community partner, a quality employer and provider of clean drinking water that meets or exceeds all quality standards. Recruiting for this position will be handled by EPCOR USA. The successful candidate will report to and be an employee of Johnson Utilities. **This position pays \$25.00 per hour, depending on experience.**

Reporting to Johnson Utilities in San Tan Valley, AZ, this individual serves as a Water Distribution Foreman, Overseeing day-to-day operations to ensure safety, efficiency and teamwork. Duties include maintaining the water distribution system, valves and hydrants. Installation of water mains, valves, hydrants and new services. Promote employee development by ensuring training is provided to employees including safety, preventative maintenance and system operations.

The Foreman is responsible for the oversight and day-to-day operation of the water distribution system, hydrants, valves and services. This includes leading the operations staff, tracking and monitoring their performance. Receive job assignments through work orders and verbal instructions from Operations Manager or Operations Supervisor and carry projects through to completion, resolving most problems independently. Prioritize work and issue daily schedules to ensure equipment and materials are in place to accomplish work assignments. Monitor work-in-progress to ensure timely completion. Inspect projects upon completion to verify that all aspects of the job have been performed properly. Read and interpret plans and specs. Contact vendors and contractors to coordinate repair/modification projects. Complete purchase requisitions, maintenance records, operations reports and other reports. Oversee equipment check sheets. Perform other work as required.

Must have knowledge of all aspects of water system operations. Working knowledge of water pumping and production facilities and water distribution system. Working knowledge in the operation of light, medium and heavy equipment as well as specialty utility repair equipment. Strong computer knowledge of Microsoft Word and Excel. Ability to communicate effectively. Ability to maintain accurate and up-to-date maintenance records. Ability to be at work every day and on time. Ability to perform heavy maneuvers. Ability to stand, bend, stoop, and to climb up and down ladders. Ability to operate company motor vehicles and equipment. Ability to determine what equipment, tools, manpower and materials will be needed to complete assigned projects; skills in contract/project management. Ability to deal courteously with customers and the general public. Ability to exercise independent judgment in operations duties, and to establish and maintain effective working relationships with internal associates, supervisor/management personnel and vendors. Ability to use both hand tools and power tools. Ability to work outdoors under all weather conditions including extreme heat and cold.

5 – 8 years of experience in all phases of water distribution operations. High school diploma or equivalent. Water Distribution 3 Certification required. Wastewater Collections certification highly desired as well. Must have valid AZ driver's license with excellent driving record. All applicants must be able to respond to call-outs and be on the job-site within 45 minutes of notification.
