

## Project Spotlight: Military Installation, USA

The United States Air Force selected Tymetal's TCRB-12 Crash-Rated Barrier Arms to upgrade their security at one of their main entry control points. Installation contractor Independent Door & Gate installed a total of four TCRB-12's giving the Air Force a proven solution for a final denial barrier.

The Base chose Tymetal's TCRB-12, M50 P-1 certified pivoting barrier arms. The units included an aluminum arm assembly, pivot stanchions, receiver stanchions and is operated manually by utilizing counter-balance weights.

Tymetal manufactures and offers a crash-rated barrier arm in a manual, hydraulic, or electrical mechanical version. Tymetal offers ASTM F2656-07 certified crash-rated beams in both a M50 and M30 option with P-1 penetrations.

### **About Independent Door & Gate:**

Independent Door & Gate is a family owned and operated business located in Pleasant Valley, Missouri that has built a reputation of quality service and installation of best in class equipment installed by factory trained technicians. They install door and gates systems, and parking and barrier access control solutions. ID&G also services and performs preventative maintenance on access systems as well as 24/7 emergency service.
