WICKS ANGUS

31st Annual Production Sale

SATURDAY, APRIL 26, 2025

Video Auction at the ranch, Carpenter, SD at 6:00 p.m.

**SELLING 56 REGISTERED ANGUS BULLS
AND 22 REGISTERED ANGUS HEIFERS**

Welcome,

to our 31st annual production sale! What a good time to be in the cattle business with the strong prices! With the strong prices, it becomes even more important to have the power behind your calves to get them to market faster. We are offering a set of bulls this year that we believe can help you do that. We have a wide range of sires represented, so we feel that we have the bull to fit your needs, knowing that each rancher has specific needs in a bull, and each bull has his own areas in which he excels.

We do not creep feed, so our weaning weights are the result of grass and maternal power of the dams. ADG's listed for the bulls are based on a 48 mcal diet during a 163 day test after weaning. The bulls have recently been on 40-70 acres of pasture, so they have had good exercise. We base our calving ease recommendations on a combination of birth weight, EPD's, CED, and the dam's history. When we recommend a bull as a heifer bull, we are confident he will be true calving ease.

We want to thank everyone who helps make sale day possible: everyone here the week of the sale to help with grooming, set up, and food prep; the Carpenter UMW ladies for serving on sale day; and all who help work cattle throughout the year. We especially want to thank all of our customers for your past business. It is sincerely appreciated! You make all this possible! We welcome new customers to check out our operation and see what we have to offer. We hope to see you April 26! Please join us for a beef supper prior to the sale and for a social after the sale! If you are unable to attend, we invite you to view via DV Auction.

With his 16.9 adj. ribeye, he will produce top grading steers! You may have noted he ratios 100 across the board; this is due to the fact that he lost his mother and was raised by a foster dam. This placed him in his own contemporary group, so his ratios do not reflect his true performance when compared to the other bulls.
