**THE PERSIAN No. PN-1**

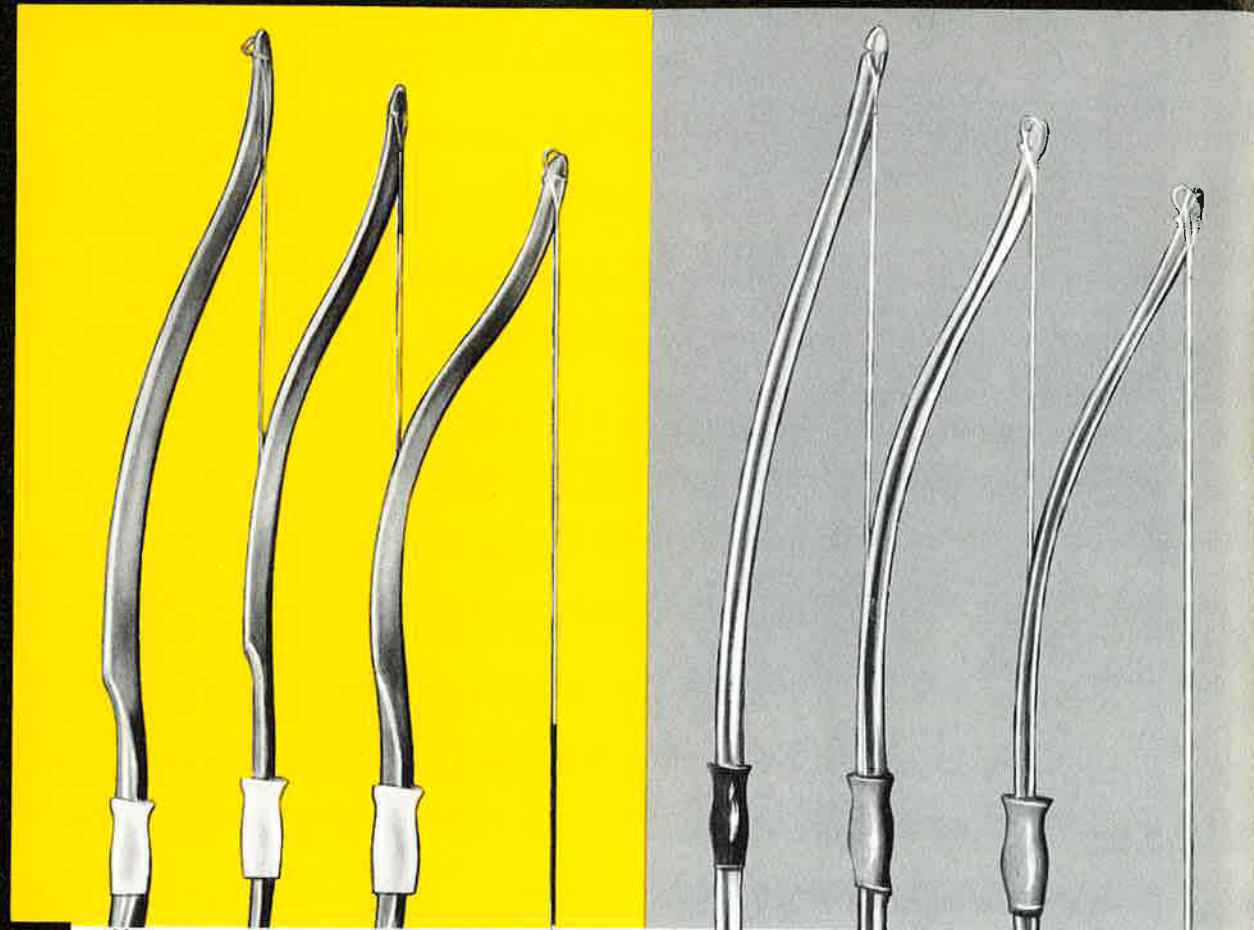

**\$75.00**

In the days when Persia was a great power, her archers were renowned, and their bows of tremendous cast and beauty. They were made of a thin wood core faced with Asiatic buffalo horn and backed with sinew and decorated in colors and gold leaf. Our Persian is a wonder bow with the ultimate in cast and performance. The center shot handle of exotic imported wood is hand rubbed to a beautiful satin smooth finish. This tournament bow deserves a discriminating archer. Draw weights: 35-55 lbs. pull. Length 62".

## STEMMLER SOLID FIBERGLASS BOWS

Both the Straight and Recurved Bows are ground from hand-laid, pre-stressed, properly cured Fiberglass blanks. Years of experience go into the making of these blanks, and they are acknowledged to be the best Fiberglass bow stock on the market. Stemmler Solid, Fiberglass Bows are practically unbreakable. All are beautifully finished.

## LEMONWOOD BOWS

A word about LEMONWOOD. It is one of the three best bow woods; the other two being Osage Orange and Yew. The best Lemonwood comes from the uplands of Eastern Cuba where the limestone in the "lomas" gives it that extra toughness and flexibility which characterizes our wood.

### HOW TO SELECT YOUR STEMMLER EQUIPMENT:

Outfitting a beginner or tested archer with the correct equipment is very important. To enjoy the sport of archery, one must feel progress in his proficiency. The proper selection of equipment will greatly enhance this experience of progress.

Shooting a bow and arrow is not a sport of strength, but of precise skill. Selecting a bow you can easily draw and hold before release, will allow you time for concentration on aiming and correct shooting technique. Most men choose a bow between 35 and 45 pounds, and women between 20 and 30 pounds. Ten pounds should be added to these weights for hunting bows. Children under 12 should select bows between 15 and 20 pounds.

Be sure the bow is braced or strung properly. STEMMLER BOWS carry these instructions.

In selecting arrows, there are many grades to choose. Within each grade the proper length arrow for each individual must be selected. This selection can best be made at your STEMMLER dealer's or with a bow of a friend. Most men choose 28" long arrows, and women choose 24" to 26" arrows. Without a bow and arrow, the proper length can be determined by the yardstick method. Place a yardstick against the center of your chest. Extend both arms and hands along the horizontal yardstick. The reading at the finger tips will give the proper arrow or draw length.

The selection of accessories, such as armguards, shooting gloves, and quivers depends upon the experience or type shooting, target, field, or hunting that may interest the archer.
