

The Fabulous

Root Bows

The Fabulous ROOT is the superlative result of many years of research, scientific study, experimentation and shooting. The refinements that make these bows so completely outstanding in comparison with the finest of other bows, are the result of hundreds of thousands of arrows shot by top target and field archers and successful bow hunters. Three basic models were gradually evolved—each one representing the ultimate bow for a particular type of shooting. Thus was born, tried, proven and highly refined, the only complete line of the highest quality laminated bows in the world today—the Fabulous ROOT.

Made from the very finest straight grain and air dried hard maple, black walnut and fiber glass, the craftsmanship on Root bows defies comparison.

RECORDS OF LARGE DEALERS PROVE THAT THE ROOT BOW IS THE MOST DURABLE LAMINATED BOW MONEY CAN BUY.
