

NEW PRODUCT RELEASE

Pop-Link® Mounting Systems by ADandD is pleased to announce a new product to our growing family!

The Clamshell is a new mounting option, available for both The PL Series and The HDPL Series.

Introducing THE CLAMSHELLS

The Clamshell has been designed for both The PL Series (PL-CS) and The HDPL Series (HDPL-CS). It is a special product designed to suit your needs for special applications should you not be able to find an ADandD product, such as a post, to accommodate your application, but you need the positioning flexibility.

The Clamshell becomes a building block for you. Simply design your own end effector and mounting post that will fit the I.D. of the Clamshell. The PL-CS has an I.D. of .501" \varnothing and the HDPL-CS has an I.D. of .751" \varnothing . Place the Clamshell into a Pop-Link® Base or Knuckle, then insert your design into the Clamshell. You're now in business.

The PL-CS and HDPL-CS are made using anodized aluminum. No additional Pop-Link® products are included in the sale of the clamshells.

Please contact us with any questions... we look forward to your inquiries!
