Frame sizes shown on this page are actual frame sizes for #400 series frames as manufactured by Waterloo Mfg., Inc., and may vary +/- 1/4". We suggest that rough openings be at least 1/2" larger in height, and 1" larger in width to allow frames to be shimmed to plumb & level.

Custom size "standard"

To calculate sizes for custom size standard pocket door frames; add 4-5/8" to the height of the door for the total frame height!

Add TWO times the width of the door plus 1-3/4" for the total width of a single unit.
OR Add 4 times the width of the door plus 1-1/8" for the total width of a double unit.
